LETTER OF TRANSMITTAL.

U. S. DEPARTMENT OF AGRICULTURE,
DIVISION OF PUBLICATIONS,
Washington, D. C., June 27, 1898.

SIR: I have the honor to transmit for publication as Bulletin No. 4 of the Division of Publications an Index to Authors with Titles of their Publications Appearing in the Documents of the Department of Agriculture from 1841 to 1897, inclusive; the agricultural reports published previous to 1862 as a part of the Patent Office reports being considered for the purposes of this work as agricultural reports. This index was prepared by Mr. George F. Thompson while assistant in charge of the document section of this Division, but it is due to him to say that while it thus appears properly, as the title-page shows, under the direction of the chief of this Division, the greater part of the work was actually done by Mr. Thompson outside of the regular business hours, and both the suggestion and the plan of the work are largely his own.

The difficulties experienced by this Division during the past two years in its effort to answer all inquiries relating to the Department publications give assurance of the usefulness of the present publication and invite further effort in the direction of index work.

Very respectfully,

Hon. JAMES WILSON,
Secretary of Agriculture.

GEO. WM. HILL,
Chief.

PREFACE.

In the Document Section, where requests for publications receive attention, a constant necessity exists for indexes of all series of the Department publications. This necessity is all the more apparent since the Division of Publications, on taking up the work of the Document Section, determined upon the policy of replying specifically to every communication received. These requests came in all manner of forms—sometimes by the number of the document, sometimes by its title, sometimes by the author's name, and sometimes by vague reference to the subject-matter. This catalogue of authors and their titles is the outgrowth of this necessity, but of course it only partially answers the requirements of complete reference books of the Department publications.

Although a conscientious effort has been made to include every author and his title, except the brief and unimportant letters appearing in the earlier agricultural reports, the hope can hardly be indulged that the catalogue is free from errors of omission; however, the hope is indulged that the errors are so few as not to impair its usefulness.

There is in the documents issued by this Department a vast amount of literature which bears no signature. There are many such articles in the annual reports and the reports of the Statistician. Of course such articles are not mentioned in an author's catalogue. Neither can proper credit be given here to a large amount of the work done on the Experiment Station Record and the seven volumes of Insect Life.

The plan of the work is to give a synopsis only where it is necessary to explain what is not clearly shown in the title. Sometimes such a title could not be framed, and in other instances there evidently was no effort to give the article a proper heading.

Previous to 1862 the agricultural reports were published as a part of the Patent Office Reports, but in this work, as in previous indexes, they are all considered as Agricultural Reports.

A key to the abbreviations used in the references is given. Articles which are without heads are supplied by myself, and are indicated by being inclosed in brackets.

GEO. F. THOMPSON.

Report of the Director of the Office of Experiment Stations. Ag. Rpt. 1890, pp. 489-555.

Introduction—Operations of the Office of Experiment Stations—Work of the year—Special features of the work of the coming year—The indication of lines of inquiry to be pursued by the stations—Representation of the experiment stations at the World's Columbian Exposition in 1893—Statistics of the stations—Stations recently organized—Lines of work pursued by the stations—Illustrations of station work—Corn—Wheat—Cotton—Leguminous plants—The acquisition of atmospheric nitrogen by plants—Feeding experiments—Simple methods of testing milk—The agricultural colleges and experiment stations—Agricultural colleges recently organized—The Association of American Agricultural Colleges and Experiment Stations—The teaching of experience regarding the work of the stations—List of publications of the Office of Experiment Stations—List of agricultural schools and colleges in the United States.

Work of the agricultural experiment stations. F. B. No. 2, pp. 16. 1890.

Atwater, W. O.—Continued.

[A report of the annual meeting of the German Association for the Advancement of Science.] E. S. R., vol. 3, pp. 207–212. 1891.

Experiment stations in Holland. E. S. R., vol. 5, pp. 669–675. 1894.

Food and diet. Y. B. 1894, pp. 357–388, illus.

Definition of food and economy—The actual nutriment of food and its cost—Nutritive ingredients of food—Cheap and dear foods—Digestibility of food—The fitting of foods to the needs of the body—Standards of daily dietaries—Dietary standards for men at muscular work—The food of people in business and professional life—Dietaries of laboring people—Food, work, and wages in the United States and in Europe—The nutrition of the workman and his elevation—Food of people with scanty nourishment—Nutrition and working power—The body of a machine—Errors in our food economy—Purchase of needlessly expensive kinds of food—Waste of food—The food of the poor—Need of research.

Methods and results of investigations on the chemistry and economy of food. O. E. S. Bul. No. 21, pp. 222, illus. 1895.

Food and its present use for nutriment—Composition of food materials—The digestibility of food—Preparation of food (cooking)—Use of food in the body—Metabolism of energy (income and outgo of body)—Pecuniary economy of food—Food consumption—Standards for dietaries—Errors in our food economy.

Foods: Nutritive value and cost. F. B. No. 23, pp. 32, illus. 1895.

Atwater, W. O., and C. F. Langworthy.

A digest of metabolism experiments in which the balance of income and outgo are determined. O. E. S. Bul. No. 45, pp. 434. 1897.

Atwater, W. O., and Charles D. Woods.

The chemical composition of American food materials. O. E. S. Bul. No. 28, pp. 47, illus. 1896.

Comments on the dietary studies at the University of Tennessee. O. E. S. Bul. No. 29, pp. 33–45. 1896.

Comments on the food investigation at the University of Missouri. O. E. S. Bul. No. 31, pp. 21–24. 1896.

Comments on the dietary studies at Purdue University. O. E. S. Bul. No. 32, pp. 23–28. 1896.

Dietary studies with reference to food of the negro in Alabama in 1895 and 1896. O. E. S. Bul. No. 38, pp. 69, illus. 1897.

(Conducted with the cooperation of the Tuskegee Normal and Industrial Institute and the Agricultural and Mechanical College of Alabama)—Composition of Alabama food materials—Description of samples of food materials—The investigations at Tuskegee—Details of dietary studies—Discussion of results.

Dietary studies in New York City in 1895 and 1896. O. E. S. Bul. No. 46, pp. 117. 1898.

Atwater, W. O., Charles D. Woods, and F. G. Benedict.

Report of the preliminary investigations on the metabolism of nitrogen and carbon in the human organism, with a respiration calorimeter of special construction. O. E. S. Bul. No. 44, pp. 64, illus. 1897.

Atwood, Geo. W.

The fruits of Florida. Ag. Rpt. 1867, pp. 140–147.

Austin, Amory.

Rice: Its cultivation, production, and distribution in the United States and foreign countries. Stat. Misc. Rpt. No. 6, pp. 76. 1893.

Butter making. Ag. Rpt. 1845, pp. 983, 984.

Bigelow, Frank H.

Report on the relations of solar magnetism to terrestrial magnetism and meteorology. Rpt. Chief W. B. 1891-92, pp. 519-525.

Notes on a new method for the discussion of magnetic observations. W. B. Bul. No. 2, pp. 40, illus. 1892.

The connection between sun spots and the weather. Mo. W. R., vol. 23, pp. 91, 92. 1895.

The periodic terms in meteorology due to the rotation of the sun on its axis. W. B. Bul. No. 2, pt. 2, pp. 500-510, illus. 1895.

Storms, storm tracks, and weather forecasting. W. B. Bul. No. 20, pp. 87, illus. 1897.

The standard system of coordinate axes for magnetic and meteorological observations and computations. Mo. W. R., vol. 25, pp. 201-204. 1897.

Meteorological observations made to determine the probable state of the sky at several stations along the path of the total eclipse of sun, May 28, 1900. Mo. W. R., vol. 25, pp. 394, 395. 1897.

Bigelow, W. D., and K. P. McElroy.

Report of investigations and analyses of canned vegetables. Chem. Bul. No. 13, pt. 8, pp. 1022-1167. 1893.

Billings, J. S., and Edward Curtis.

Report of results of examinations of fluids of diseased cattle with reference to presence of cryptogamic growths. Dis. Cattle, pp. 174-190, illus. 1869.

Report of results of examinations of fluids of diseased cattle with reference to presence of cryptogamic growths. Dis. Cattle, pp. 156-170, illus. 1871.

Bingham, W. J.

[Report on farm crops, etc., in North Carolina.] Ag. Rpt. 1850, pp. 375-377.

Bird, W. N. D.

Ergotism in Kansas. 12th and 13th Rpts. B. A. I., pp. 317, 318. 1897.

Birkheimer, William E.

Sketch of the work of the Signal Service Bureau for the agriculturist. Unnum. rpt., pp. 110-114, in "Proceedings." 1882.

Sketch of the work of the Signal Service Bureau for the agriculturist. Misc. Spl. Rpt. No. 9, pp. 191-196. 1885.

Bissell, G. W.

Shopwork instruction at the Iowa State College of Agriculture and Mechanic Arts, Ames, Iowa. O. E. S. Bul. No. 20, pp. 65-67. 1894.

Bixby, William H.

Report on wood creosote oil. For. Bul. No. 1, pp. 99-103. 1887.

Black, William J.

[Report on the commerce of Nuremberg, Germany.] For. Mkts. Bul. No. 2, pp. 72-77. 1895.

Animals, cereals, dairy products, canned meats, tobacco, fruits, alcoholic liquors, seeds.

Blackmar, O. B.

[Report on farm crops, etc., in Michigan.] Ag. Rpt. 1849, pp. 148-186.

Blackwell, Henry B.

Beet sugar in Maine. Spl. Rpt. No. 61, pp. 26, 27. 1883.

Blaisdell, F. E.

Notes on the habits of some species of Coleoptera observed in San Diego County, California. I. L., vol. 5, pp. 33-36. 1892.

Blanchard, H.

Woolgrowing, wool depots, etc. Ag. Rpt. 1849, pp. 244-251.

What the prevailing races?—What the average weight of fleece of different races?—What is the cost of keeping sheep through the year, per head?—What is the condition of this branch of industry?—Where are your markets?—The effects produced on wool by keeping of sheep—On washing and shearing.

Blaney, James V. Z.

Analysis of prairie soil. Ag. Rpt. 1849, pp. 488-490.

Blanford, W. F. H.

Notes on Scolytidæ and their food plants. I. L., vol. 6, pp. 260-265. 1894.

Bleclynder, A. H.

Rheea fiber. Mo. Rpt. 1870, p. 227.

Blight, George.

The value of the Guenon system. Misc. Spl. Rpt. No. 2, p. 233. 1883.

Bliss, Edward.

Territory of Colorado: Its soil—its climate—its mineral products and resources. Ag. Rpt. 1861, pp. 154–157.

The great American desert—The pastoral region—Agricultural resources of Colorado—Irrigation—The climate—Mineral products—Improvements.

Blodget, Lorin.

Agricultural climatology of the United States compared with that of other parts of the globe. Ag. Rpt. 1853, pp. 328–432.

Forest cultivation on the Plains. Ag. Rpt. 1872, pp. 316–332.

The climate and cultivable capacity of the plains considered in regard to the ameliorations possible through greater production by forests—Proportion of rainfall thrown off in surface drainage.

Blount, A. E.

Improvement of the cereals. Unnum. rpt., pp. 104–107, in "Proceedings." 1882.

Blue, John H.

[Report on farm crops, etc., in Missouri.] Ag. Rpt. 1851, pp. 449–452.

Boardman, Samuel L.

Some outlines of the agriculture of Maine. Ag. Rpt. 1862, pp. 39–59.

The farm stock of Maine—The dairy—The hay crop, grass lands and pastures—The cereals—Fruit culture—Maple sugar and sirup—Fish and fish breeding—Marine manures—Associative efforts and legislative action for the encouragement of agriculture.

Sheep husbandry in the West. Ag. Rpt. 1862, pp. 286–299.

Summer management—Winter management.

The climate, soil, physical resources, and agricultural capabilities of the State of Maine, with special reference to the occupation of its new lands. Misc. Spl. Rpt. No. 3, pp. 60. 1884.

The tidal lands and diked marshes of Nova Scotia and New Brunswick. Misc. Spl. Rpt. No. 7, pp. 33–61, illus. 1885.

Bödiker, T.

The German Empire. Mo. Rpt. 1874, pp. 266–273.

Geography and chorography—Climate—Soil—Land tenure—Tillage, live stock, etc.—Forestry—Population—Transportation and trade—Military establishment—Taxation—Local government—Education.

Bolley, H. L.

Cheese-curd inflation: Its relation to the bacterial flora of foremilk. O. E. S. Bul. No. 30, pp. 78–82. 1896.

Bollman, Lewis.

Indian corn. Ag. Rpt. 1861, pp. 262–288.

The value of the corn crop—The internal trade dependent on the corn crop—The export trade of corn and its products—The cultivation of corn as an exhausting crop considered—In what way does the cultivation of corn exhaust the soil?—Of the action of mold in the production of crops—From what source do plants derive moisture in times of drought?—How mold may best be restored to the soil—The different kinds of corn—The proper manner of saving seed—Implements—Breaking up—Harrowing—Laying off—Planting—Cultivation—Cutworms—Moles—Thinning out—Harvesting.

Bollman, Lewis—Continued.

The wheat plant. Ag. Rpt. 1862, pp. 65–95.

The wheat region of the United States—The influence of railroads on wheat producing—The present and future market for American wheat—The best soils for wheat production—Cultivation—Harvesting.

Cultivation of the sorghum. Ag. Rpt. 1862, pp. 140–147.

General character of the soil—The number, quality, etc., of the specimens—The proper mode of growing the sorghum—What, then, constitutes a well-ripened sorghum cane?—How long may the cane be kept after being cut up?

Report on agricultural statistics. Ag. Rpt. 1863, pp. 597–621.

The plan adopted for the annual collection of the yield of the crops and the amount of farm stock, by the Agricultural Department, with a notice of that in use in England and Prussia—The harvest in the several provinces of Russia—Tables of the amounts, etc., of the products of the loyal States—Table relating to farm stock—Tables of imports and exports and of the exports of the principal agricultural products from New York and their prices; of the receipts, shipments, and prices of them at Chicago and New York; of the imports of wheat by Great Britain and of our exports of provisions; of hogs and cattle at Chicago, and of the hog crop and prices at Cincinnati—Chicago and Northwestern agriculture—Pork and cattle trade of Chicago—The pork packing of the West.

The hop plant. Ag. Rpt. 1864, pp. 97–110.

Import of hops by Great Britain—Export of hops by the United States—Enemies and diseases—Soil and manure—The location and management of the hop grounds—Cultivation of the hop plant—Picking, drying, and packing.

Report of agricultural statistics. Ag. Rpt. 1864, pp. 564–605.

Letter of the Statistician to the Commissioner of Agriculture—Tables showing the condition of the crops for 1864—Summary for each State, showing the amount, the number of acres, and the value of each crop for 1864—Tables showing the number, price, and value of live stock in each State—Imports and exports of New York—Exports of specie from New York and San Francisco—The national debt—The taxes on manufactures—Exports and prices of farm produce—Tables showing the value of the currency—Imports of foreign wool at New York during the years 1863 and 1864—Wool product of California—Wool product of the Atlantic loyal States—Live stock for food—California wines.

The industrial colleges: The nature of the education to be given in them; their several kinds and courses of instruction considered. Spl. Rpt. (unnum.), pp. 24. 1864.

Silk cultivation. Ag. Rpt. 1872, pp. 304–316.

Causes that made this condition favorable—The past and present prices of raw silk—The experience of other nations against large investments—The present condition of silk production in California—How best can silk culture be established here?—Directions for the experienced silk grower—Atmospheric conditions—The mulberry plants—The silkworms—The production of eggs—Buildings.

Bolton, B. Meade.

Report on epidemic diseases among swine. 6th and 7th Rpts. B. A. I., pp., 135–137. 1891.

Bond, Samuel, and John Pope.

[Report on farm crops, etc., in Arkansas.] Ag. Rpt. 1849, pp. 171–174.

Bondurant, Thomas M.

[Report on farm crops, etc., in Virginia.] Ag. Rpt. 1851, pp. 301–305.

Bonsall, Spencer.

Tea: Its culture and manufacture; with directions for the soil, character of climate, etc., adapted to the culture of the plant in the United States, from practical experience, acquired by a residence of six years in Assam. Ag. Rpt. 1860, pp 446-467, illus.

Bonson, Joseph.

[Report on farm crops, etc., in St. Croix County, Wisconsin.] Ag. Rpt. 1848, pp. 549-551.

Bonyng, Frank.

Tea cultivation—Assam, India. Ag. Rpt. 1850, pp. 170-179.

Preliminary remarks—The inhabitants of the forest—The natives of Assam—Soil fit for tea—Produce of the plant and age—Estimate of expenses and returns on a cultivation of 1,250 acres—Tea culture in China—Introduction into America.

Boone, William.

[Report on farm crops, etc., in Tennessee.] Ag. Rpt. 1852, pp. 311-313.

Booth, Edwin G.

[Report on farm crops, etc., in Virginia.] Ag. Rpt. 1851, pp. 311-314.

Booth, James C.

Practical value of the analysis of soils. Ag. Rpt. 1852, pp. 49-57.

Booth, William L.

[Report on farm crops, etc., in Michigan.] Ag. Rpt. 1850, pp. 309, 310.

[Report on farm crops, etc., in Michigan.] Ag. Rpt. 1852, pp. 284, 285.

Börger, C.

The international polar expeditions, 1882-83. W. B. Bul. No. 2, pt. 2, pp. 469-485. 1895.

Bos, J. Ritzema.

Phytomyza affinis as a cause of decay in clematis. I. L., vol. 6, pp. 92, 93. 1893.

Aphelenchus olesistus, a nematoid worm, cause of leaf sickness in begonia and asplenium. I. L., vol. 6, pp. 161-163. 1893.

Bosse, Eugene.

Flax culture in the Northwest. Fiber Rpt. No. 4, pp. 40-43. 1892.

Flax culture in Wisconsin and Minnesota. Fiber Rpt. No. 4, pp. 43-46. 1892.

Bossert, Frederick.

Wine. Ag. Rpt. 1863, pp. 156-158.

The manufacture of grape, blackberry, and other fruit wines, on Gall's method, with a few remarks on the cultivation of the grapevine in Germany, France, and the United States.

Bossin, M.

On the gigantic spurry. Ag. Rpt. 1845, pp. 979, 980.

Bourne, John H.

System of farm accounts. Ag. Rpt. 1865, pp. 502-509.

Inventory of farm stock, tools, etc., April 1, 1865—Journal—Cash book—Corn field—Carrots—Onions—Beef account—Grocer's account—Butcher's account.

Bourne, Silvanus.

[Report on farm crops, etc., in Massachusetts.] Ag. Rpt. 1852, p. 162.

Bowhill, Thomas.

Anthrax and Southern fever among California cattle. 4th and 5th Rpts. B. A. I., pp. 443-450. 1889.

Bowie, W. W. W.

Prize essay on the culture and management of tobacco. Ag. Rpt. 1849, pp. 318-324.

Culture and management of tobacco. Ag. Rpt. 1867, pp. 179-184.

Selection and preparation of the soil—Transplanting the plants—Cultivating the plants—Cutting and curing—The old system of growing tobacco—The new system of growing tobacco.

Bowlsby, George W.

[Report on farm crops, etc., in Michigan.] Ag. Rpt. 1850, pp. 410, 411.

Bowman, John.

[Report on farm crops, etc., in New York.] Ag. Rpt. 1852, pp. 196-199.

Boyce, Henry.

[Report on farm crops, etc., in Louisiana.] Ag. Rpt. 1847, pp. 389-391.

Boyd, S. S.

[Report on farm crops, etc., in Indiana.] Ag. Rpt. 1852, pp. 309-310.

Boyer, C. B.

[Report on farm crops, etc., in Indiana.] Ag. Rpt. 1852, pp. 290-293.

Boyer, C. R.

[Report on farm crops, etc., in Indiana.] Ag. Rpt. 1850, pp. 462-464.

Boyesen, Otto H.

[Report on the commerce of Gothenburg, Sweden.] For. Mkts. Bul. No. 8, pp. 86-91. 1896.

Boynton, Henry.

Spanish Merinos and their management. Ag. Rpt. 1864, pp. 196-203, illus.

Their antiquity—The demand for them—Management of sheep in winter—Water—Their food—Feeding turnips—Feeding grain—Regularity of feeding—Docking lambs—Their management in summer.

Brackett, G. B.

Report of the Pomologist. Ag. Rpt. 1897, pp. 147-151.

Bradford, L. J.

The culture and management of tobacco. Ag. Rpt. 1863, pp. 87-91.

Hemp culture. Ag. Rpt. 1863, pp. 91-95.

Culture of seed—Preparation of land—Putting in the crop—Ripening and harvesting.

Essay on the culture and management of tobacco. Mo. Rpt., Jan.-Feb., 1864, pp. 26-30.

Bradley, J. N.

Swine and fowl industry of Missouri, and annual loss by disease.
2d Rpt. B. A. I., pp. 418-423. 1886.

Cattle interests west of the Mississippi. 2d Rpt. B. A. I., pp.
424-428. 1886.

Bradley, R.

A general treatise on husbandry and gardening, with a variety of
curious cuts. Ag. Rpt. 1866, pp. 100, 101, illus.

Brady, John P.

[Report on farm crops, etc., in Indiana.] Ag. Rpt. 1849, pp.
194-196.

Brown, J. P.

Report on the forests of Washington Territory. Rpt. Forestry, vol. 4, pp. 388-393. 1884.

Brown, Ryland T.

Report of the Chemist. Ag. Rpt. 1871, pp. 89-101.

Analysis of commercial manures—Nitrophosphate of lime—Phosphatic blood guano—Cotton-bale brand superphosphate—Double refined poudrette—Coe's ammoniated bone superphosphate—Superphosphate—Masse's nitrogenized superphosphate of lime—Analysis of miscellaneous substances—Tuckahoe, or Indian bread—Virginia sumac—*Ilex cassina*, or Carolina tea—Ashes from spent tan bark—Analysis of soils.

Brown, Ryland T.—Continued.

Chemical memoranda. Mo. Rpt. 1872, pp. 76-79.

Woody fiber of plants—Orange culture—Wood ashes—Bones and bone meal—German potash.

Chemical notes. Mo. Rpt. 1872, pp. 137-142.

Sulphur in mineral coal—Ohio limestones—Artificial water lime—Germination; its relation to light—Carbolic acid as a disinfectant—Available nitrogen—Formulae for fertilizers.

Report of the Chemist. Ag. Rpt. 1872, pp. 138-158.

Natural fertilizers—Miscellaneous analyses—Experiments to determine the influence of growing vegetation on temperature—The wastes of cities and towns—Beet sugar.

Chemical memoranda. Mo. Rpt. 1872, pp. 218-222.

Analysis of commercial fertilizers—Beet sugar.

Chemical memoranda. Mo. Rpt. 1872, pp. 307-313.

Examination of marls—Mineral constituents of wheat—Production of nitrogen compounds in soils—Constituents of stubble—Carbolic acid from living vegetation—Absorption of water by leaves—Composition of cream—The value of human excrement as a fertilizer.

Chemical memoranda. Mo. Rpt. 1872, pp. 371-381.

Laboratory work—Soil temperature—Influence of vegetable mold on soils—Utilization of sawdust—Assimilation of crops—Increased consumption of sugar—Respiration of fishes—Bismuth—Milk—*Eucalyptus globulus*—Printing cloth—Aluminum coins—Cooking utensils—Nitrate of ammonia in respiration—Production of ozone in the air—Paper lamp shades—Non-inflammable fabrics—Chromium steel—Progress of chemistry—Chloralum—Wastes of cities (embodying letter from James Alexander Manning).

Chemical memoranda. Mo. Rpt. 1872, pp. 440-446.

Laboratory work—Sulphur—Welding copper—Zinc labels—Artificial marble—Artificial butter—Potassium by a new method—Phosphoric acid—Osage orange—Effect of atmospheric pressure—Topographical measurements in the West—Preserving action of boracic acid—Spontaneous combustion of wood—The value of girardin as a disinfectant—Tests for silk goods—Preservation of wood—Sensitive streams—Dying veneer wood.

Chemical memoranda. Mo. Rpt. 1872, pp. 500-505.

Analyses—Value of city wastes—Absorption of ammonia by charcoal—The black soil of Russia—Observations on the sun's rays—Influence of alcohol on animal heat—Cultivation of cinchona trees in Java—Paper from wood—Ammonia from bituminous coal—Improvements in street cars—Native sulphur—Uniform standard of measure—Effects of compressed air on combustion.

The organization of agriculture. Unnum. rpt., pp. 108-110, in "Proceedings." 1882.

Brown, Simon.

On the value and uses of swamp muck. Ag. Rpt. 1856, pp. 182-198.

Farmers' gardens. Ag. Rpt. 1863, pp. 337-366.

Location of the garden—Proper soil for the garden—Shelter for gardens—Hotbeds for farmers' gardens—Culture of vegetables in the garden—Fruit in the garden—Strawberries—Raspberries—Grapes—Raising, gathering, and preserving seeds for the garden—What soil is best for the production of good seed—What time to set seed-plants or sow seeds—What plants are injured by intermixture—What part of the stem produces the best seed—When should seeds be gathered and how preserved—Time that seeds will retain their vitality—Flowers in the garden.

Brown, Simon, and Joseph Reynolds.

Manures and their application. Ag. Rpt. 1865, pp. 368-395.

Composition of manures—The sources of manure—Preparation of manure—Liquid manure—Special manures—Guano—Composition of guano—How and when to apply guano—Bones and superphosphates of lime—Salt-peter—Poudrettes—The application of manures.

Brown, T. A.

The agriculture of Morocco. Ag. Rpt. 1862, pp. 499–508.

Letter from China. Mo. Rpt. 1865, pp. 11–13.

[Address on road improvement.] Road Inq. Bul. No. 10, pp. 35, 36. 1894.

Colman, Norman J.

Report of the Commissioner of Agriculture. Ag. Rpt. 1885, pp. 5–31.

[Address before the Convention of delegates from Agricultural Colleges and Experiment Stations, held at Department of Agriculture, July 8 and 9, 1885.] Misc. Spl. Rpt. No. 9, pp. 5–15. 1885.

Objects of the endowments—Acquiring agricultural knowledge—Teaching practical forestry—An arboretum on college farms—Hedges or live fences—Climatic influences on plants—Rotation of crops—Experiments with the cotton plant—Improved varieties by hybridization—Diseases of plants—Knowledge needed by the agriculturist—Experimental farm work—Greater diversity of crops—Textile fibers imported—Fruits and plants from Russia—Signal service in agricultural colleges.

Colman, Norman J.—Continued.

[Address before the Convention of Agricultural Colleges and Experiment Stations.] Unnum. rpt., pp. 17. 1885.

[Address before the Association of Official Agricultural Chemists, held at the Department of Agriculture, September 1 and 2, 1885.] Chem. Bul. No. 7, pp. 21-23. 1885.

The American beef supply. Unnum. rpt., pp. 3-11. 1885.

Address before the National Stockmen, held at Chicago, Illinois, November 17 and 18, 1885.

Report of the Commissioner of Agriculture. Ag. Rpt. 1886, pp. 7-45.

Letter transmitting a statement of the expenditures for the Department of Agriculture for the fiscal year ended June 30, 1885. H. Misc. Doc. No. 154, pp. 43. 1886.

Letter transmitting, in response to a resolution of the House, a statement showing the amount expended for the Chemical Division in laboratory from the appropriation for the present fiscal year, and the balance unexpended. H. Misc. Doc. No. 240, pp. 4. 1886.

Letter transmitting certain papers in response to a resolution of the House calling for a copy of Department circular of June 6, 1882; a copy of the award of the committee appointed to carry the provisions of the circular into effect; copies of all correspondence with the Delaware Beet Sugar Company on the subject; and a statement of the awards paid and to whom. H. Misc. Doc. No. 284, pp. 6. 1886.

Report of the Commissioner of Agriculture. Ag. Rpt. 1887, pp. 7-47.

[Address before the National Cattle Growers' Convention, held at Kansas City, Missouri, October 31 and November 1 and 2, 1887.] Unnum. rpt., pp. 3-6. 1887.

Letter in response to a Senate resolution of December 7, 1887, relative to employees obtaining patents for the process of sugar making. S. Ex. Doc. No. 24, pp. 5. 1887.

Rules and regulations of the U. S. Department of Agriculture for the suppression and extirpation of contagious, infectious, and communicable diseases among domestic animals of the United States. Unnum. rpt., pp. 4. 1887.

Dressed meat traffic. 3d Rpt. B. A. I., pp. 277-282. 1887.

Letter in response to Senate resolution of January 30, 1888, transmitting the report of Professor Swenson. Unnum. rpt., pp. 11. 1888.

Letter transmitting a statement of expenditures in the Department for the fiscal year ended June 30, 1887. H. Misc. Doc. No. 122, pp. 81. 1888.

Report in response to inquiries of the select committee of the United States Senate, appointed to inquire into and examine the methods of business of the Executive Departments. Unnum. rpt., pp. 106. 1888.

Colman, Norman J.—Continued.

Report of the Commissioner of Agriculture. Ag. Rpt. 1888, pp. 7–51.

Increasing the durability of timber. For. Circ. No. 4, pp. 4. [No date.]

Value and management of Government timber lands. Misc. Spl. Rpt. No. 5, pp. 22-27. 1884.

Report of Chief of Forestry Division. Ag. Rpt. 1886, pp. 149-226, chart.

Significance of forests—Mechanical influence—Climatic influence—Effects of deforestation on the climate—Effects of deforestation on water supply—Effect of deforestation on the condition of the soil—Condition of forest supplies and forestry in the United States—Area required for continued supply—Building materials—Imports and exports of wood from 1883 to 1886—Government timber land—Plan for a forest department—Government plantations—Private forests—Difficulties to be overcome—Farmer's interest in forest property—Forest planting and management in the United States—Government action in regard to its own lands—Forest commissions—Forestry Division—Statistical inquiries—Phenological observations—Biological studies—Inspection of Western tree planting—Legislation—Timber-culture act—Arbor day—Literature—Forest policy—General principles of forestry—What is a plant—Hints as to planting—Specially valuable trees—Forest management—Coppice management—Standard coppice—The timber forest—Management in Echelous—Regeneration method—Cleaning and thinning—Other methods of management—Conclusion.

Report of chief of Forestry Division. Ag. Rpt. 1887, pp. 605-616, maps.

What is the first duty of the General Government in regard to the forestry question?—System of forestry investigations.

Report of Chief of Forestry Division. Ag. Rpt. 1888, pp. 597-641, illus.

Distribution of plant material—Forestry interests in the States—Forest influence—Technological investigations—Metal ties—Trade notes and statistics—Cultural notes—Forest farming—Paris Exposition.

Snow slides and avalanches: Their formation and prevention. For. Bul. No. 2, pp. 236-250. 1889.

Metal tie notes. For. Bul. No. 3, pp. 23, 24. 1889.

Report of Chief of Forestry Division. Ag. Rpt. 1889, pp. 273-330, illus.

Seed and seedling distribution—Timber-culture act—Osier culture—Forestry interests in the United States—Export and import statistics—Proposed work—Influence of forests on water supplies—Influence upon precipitation—Disposal of water supplies—Elements of dissipation—Elements of conservation—Elements of distribution.

Report of Chief of Forestry Division. Ag. Rpt. 1890, pp. 193-236.

Wood-pulp industry—Adaption of woods—Timber tests—Forestry interest in the States—The property—The contract—A lesson in forestry—Forest policy—Forest fires—Organization—Forestry education—Statistics of exports and imports of wood and wood products—Artificial rainfall—Conclusion.

Consumption of forest supplies by railroads, and practicable economy in their use. For. Bul. No. 4, pp. 13-39, illus. 1890.

Report on the consumption of ties and other lumber by railroads in the United States. For. Bul. No. 4, pp. 41-52. 1890.

The forest and its significance. For. Bul. No. 5, pp. 7-10. 1891.

Fernow, B. E.—Continued.

Forestry in a wooded country, or forest management. For. Bul. No. 5, pp. 11–30. 1891.

Forest planting in a treeless country. For. Bul. No. 5, pp. 31–44. 1891.

Report of the Chief of Division of Forestry. Ag. Rpt. 1891, pp. 191–229, illus.

Introductory—Seed distribution—Rainfall experiments—Water management the problem of the future—Forestry lectures—Statistics of exports and imports of wood and wood products—Poisoning of street trees—A national arboretum—Bamboo as a substitute for wood—Forest-planting experiments—Instructions for a forest-planting experiment on the sand hills of Nebraska—Southern timber pines—Distribution and habitat—Characteristics of distribution in different regions—Quality and adaptation of woods—Discussion of common names—Uniformity of nomenclature in the market—Forest reservations and their management—Personnel—Regulations—Timber licenses.

The ravages of *Liparis (Psilura) monacha* in Germany, and means of defense. I. L., vol. 3, pp. 379–382. 1891.

Report of the Chief of the Division of Forestry. Ag. Rpt. 1892, pp. 293–358, illus.

The work of the year—Revision of nomenclature—A national arboretum—Forestry lectures—Seed and seedling distribution—Forest-planting experiment—Publications—The World's Fair—The situation—Original condition of forest areas—Causes of reduction in forest areas—Fires—Fires set by railroads—Forest-fire legislation—An act for the protection of forest property—Extent of forest area—Ownership—The forestry movement—Report on Chickamauga National Park—Additions to the forest flora of North America, and necessary changes in nomenclature of important timber species, with notes—The naval-store industry—Turpentine orcharding—Products of the turpentine industry—Sources of supply—Historical notes and statistics—Physiology of resins—Methods of working trees—Principles to be observed in turpentine orchards—Turpentine orcharding in America—Inspection laws relating to resinous products—Turpentine orcharding in Europe—Management of turpentine pineries—Gathering of spruce turpentine—Gathering of larch turpentine—Gathering fir turpentine—Effects of turpentine orcharding on timber, tree, and forest, and suggestions for improvement on American practice—Suggestions for improvement—Additional notes on the turpentine industry—Improvement in the distillation of the crude turpentine by the application of steam—Products of the destructive distillation of the wood of the longleaf pine.

Scope and historical development of the science of “timber physics.” For. Bul. No. 6, pp. 17–30. 1892.

Forest influences. Introduction and summary of conclusions. For. Bul. No. 7, pp. 9–22. 1893.

Relation of forests to water supplies. For. Bul. No. 7, pp. 123–170, illus. 1893.

Notes on the sanitary significance of forests. For. Bul. No. 7, pp. 171–173. 1893.

Report of the Chief of the Division of Forestry. Ag. Rpt. 1893, pp. 303–364, illus.

Work of the year—Timber investigations—Chemical analyses of woods—Tree measurements and acre-yield determinations—Botanical work—Distributions of hand collections—Seed and seedling distribution—Publications—Letter to the Secretary of Agriculture regarding forest growth and timber consumption—Consumption and supply of forest products in the United States—Extent of forest areas—Inadequacy of forest supplies—Quantity and value of forest products—Forestry exhibit at the World's Fair—Advance of forestry interests during the year—German forest manage-

Fernow, B. E.—Continued.

ment—Map work and forest districting—Survey of the forest district—Principles of management—Forest regulation—Progress of work required to bring areas under rational forest management—Methods of forest regulation—Valuation work—Arrangement of age classes—Yield calculations—Felling budget—Statistics of forest distribution—Methods of harvesting and transportation—Price of wood in the forest—Price of manufactured lumber—Good roads—Forest protection—Forest crop production or silviculture—Planting—Introduction of exotics—White-pine yields—Coppice management—Standard coppice—The timber forest—Regeneration methods—Improvement cuttings and thinnings—Underplanting—Forestry education and forestry literature—Literature—Forestry associations—Forest experiment stations.

Report of the Chief of Division of Forestry. Ag. Rpt. 1894, pp. 133–142.

Functions of the Division of Forestry in general—Office work—Publications—Botanical and Museum work—Seed and plant distribution—Collection of materials—Physical laboratory—Tree measurements and acre-yield determinations.

Description of the various methods of impregnation as practiced for the Prussian railways. For. Bul. No. 9, pp. 286–291. 1894.

Forestry for farmers. Y. B. 1894, pp. 461–500, illus.

How trees grow—Food materials and conditions of growth—Soil conditions—Light conditions—Physiology of tree growth—"Sap up and sap down"—Process of development—Growth in length and ramification—Growth in thickness—Form development—Rate of growth—Reproduction—How to plant a forest—What trees to plant—Methods of planting—How to treat the wood lot—Improvement cuttings—Methods of reproducing the wood crop—Size of openings—Wind mantle—Coppice—Plan of management—How to cultivate the wood crop—Effect of light on wood productions—Number of trees per acre—Weeding and cleaning the crop—Methods of thinning—What trees to remove.

Report of the Chief of Division of Forestry. Ag. Rpt. 1895, pp. 149–152.

Publications—Timber investigations—Turpentine orcharding—Tree measurements—Forest planting experiments—Propaganda work.

The relation of forests to farms. Y. B. 1895, pp. 333–340, illus.

The forest waters the farm—The forest tempers the farm—The forest protects the farm—The forest supplies the farm with useful material.

Report of the Chief of Division of Forestry. Ag. Rpt. 1896, pp. 83–88.

Appropriations and expenditures—Personal and Divisional force—Correspondence—Timber physics—Publications—Tree measurements—Experimental forest plantings—Atlanta Exposition—Continuation of timber investigations—Need of a suitable laboratory—Canvass of forest conditions.

Facts and figures regarding our forest resources briefly stated. For. Circ. No. 11, pp. 8. 1896.

Southern pine: Mechanical and physical properties. For. Circ. No. 12, pp. 12, illus. 1896.

Forest-fire legislation in the United States. For. Circ. No. 13, pp. 8. 1896.

[Timber pines of the Southern United States. Introduction.] For. Bul. No. 13, pp. 11–25, illus. 1896.

Is protection against fires practicable? For. Circ. No. 14, pp. 4. 1896.

Fernow, B. E.—Continued.

Summary of mechanical tests on thirty-two species of American woods. For. Circ. No. 15, pp. 12. 1896.

Report of the probable amount of white pine and other coniferous timber standing, and its consumption in the United States. S. Doc. No. 40, pp. 21. 1897.

Report of the Chief of Division of Forestry. Ag. Rpt. 1897. pp. 141-146.

Chief lines of investigation—Tree-planting experiments—Timber physics—Biological inquiry—Investigations of forest conditions—Timber trees for the arid regions—Publications—Personnel—Correspondence—Propaganda.

Note on adhesion of spikes. For. Bul. No. 1, pp. 62-65. 1887.

[Notes on wood preservatives.] For. Bul. No. 1, pp. 104, 105. 1887.

Annual charges for ties. For. Bul. No. 1, pp. 105-127, illus. 1887.

Age of trees and time of blazing determined by annual rings, For. Circ. No. 16, pp. 11, illus. 1897.

The Government timber tests. For. Circ. No. 7, pp. 4. [No date.]

Effect of turpentine gathering on the timber of longleaf pine. For. Circ. No. 9, p. 1. [No date.]

Strength of "boxed" or "turpentine" timber. For. Circ. No. 8, pp. 3. [No date.]

Suggestions to the lumbermen of the United States in behalf of more rational forest management. For. Circ. No. 10, pp. 8. [No date.]

The animal industries of the United States with special reference to breeding of cattle, horses, etc. Misc. Spl. Rpt. No. 2, pp. 122-127. 1883.

Galloway, B. T.

Report of the Chief of the Section of Vegetable Pathology. Ag. Rpt. 1888, pp. 325-404, illus.

Experiments in the treatment of grapevine diseases made in 1888—Necessity for more extended field work—Miscellaneous subjects—Downy mildew of the potato (*Phytophthora infestans*)—Notes on the black rot of the tomato—A disease of the tomato—Brown rot of the cherry (*Monilia fructigena*)—The powdery mildew of the cherry (*Podosphaera oxycantha*)—Leaf-blight and cracking of the pear (*Entomosporium maculatum*)—Leaf-spot of the rose (*Cercospora rosicola*)—Plum pockets (*Taphrina pruni*)—Apple rusts—Septosporium on grape leaves—Leaf-spot disease of the maple (*Phyllosticta acericola*)—A disease of the sycamore (*Glaesporium nervisequum*)—The leaf-rust of cotton woods (*Melampsora populina*)—Report on peach yellows—Additional notes on celery leaf-blight (*Cercospora apii*).

Potato scab. Bot. Bul. No. 8, pp. 45-51, illus. 1889.

Gum disease, or foot rot, of the orange. Bot. Bul. No. 8, pp. 51-54. 1889.

Notes on fruit diseases. Jour. Mycol., vol. 5, pp. 37, 38. 1889.

Sulphuret of potassium for bitter rot of the apple—Bordeaux mixture for the plum leaf-blight—A tomato disease.

Notes. Jour. Mycol., vol. 5, pp. 92-96. 1889.

Ascospores of the black-rot fungus as affected by covering with earth—The grape leaf-blight—Kansas fungi—The ash leaf-rust (*Ecidium fraxini*)—Treatment of grape mildew made obligatory (*Diorchidium tracyi*)—A new modification of the Vermorel nozzle.

Prevention of smut. Jour. Mycol., vol. 5, pp. 164, 165. 1889.

An experiment in the treatment of the black rot of the grape. Jour. Mycol., vol. 5, pp. 204-209. 1889.

Notes. Jour. Mycol., vol. 5, pp. 214-216. 1889.

Powdery mildew of the bean—Rust of flax—Necessity for a redescription of the type species in Kew herbarium—New localities for *Peronospora cubensis*.

A partial list of the parasitic fungi of Missouri, with remarks on the species of economic importance. Bot. Bul. No. 8, pp. 54-59. 1889.

Report of the Chief of the Section of Vegetable Pathology. Ag. Rpt. 1889, pp. 397-452, illus.

Publications and correspondence—Field work—Treatment of grape diseases—Treatment of the diseases of the apple, pear, and quince—Apple scab—Bitter rot of the apple—Apple rust—Apple powdery mildew—Pear leaf-blight—Quince diseases—Treatment of blackberry rust (*Caoma nitens*) and other diseases at Ocean Springs, Miss.—Treatment of the potato, tomato, and melon for blight and rot—Potato rot—Tomato rot—Melon diseases—Strawberry leaf-blight—Conclusions concerning the practical work of the section—Laboratory investigations—Investigation of peach yellows—The California vine disease—Mignonette disease (*Cercospora resedæ*).

Report of the Chief of the Division of Vegetable Pathology. Ag. Rpt. 1890, pp. 393-408, illus.

Work of the division—General business—Laboratory work—Field experiments—Experiments near Washington—Cooperative experiments—Work of field agents—Some practical results of the treatment of plant diseases—Fungicides and spraying apparatus—Peach yellows investigation—The California vine disease—Special subjects—Hollyhock anthracnose (*Colletotrichum malvarum*)—Anthracnose of cotton (*Colletotrichum gossypii*)—Ripe-rot of grapes and apples (*Glaesporium fructigenum*).

Galloway, B. T.—Continued.

Treatment of black rot, brown rot, downy mildew, powdery mildew, and anthracnose of the grape; pear-scab and leaf-blight, and apple powdery mildew. Jour. Mycol., vol. 6, pp. 11–15. 1890.

Notes on fungicides and a new spraying pump. Jour. Mycol., vol. 6, pp. 25, 26. 1890.

Description of a new knapsack sprayer. Jour. Mycol., vol. 6, pp. 51–59, illus. 1890.

Report of the Chief of the Division of Vegetable Pathology. Ag. Rpt. 1891, pp. 359–378, illus.

Publications and correspondence—Miscellaneous subjects—Laboratory investigations—Field experiments—Treatment of the diseases of nursery stock—Treatment of apple, pear, peach, plum, cherry, and quince diseases in the orchard—Treatment of grape diseases—Treatment of black rot of sweet potatoes—Treatment of oat blight—Spraying machinery—Work in New York State—Investigation of peach yellows and peach rosette—The California vine disease—Work on pear blight—Citrus fruit diseases in Florida—The grape scale in New York—Sweet potato black rot (*Ceratocystis fimbriata*).

Fungous diseases of the grape. F. B. No. 4, pp. 12. 1891.

A new pear disease. Jour. Mycol., vol. 6, pp. 113, 114. 1891.

Disease of geraniums. Jour. Mycol., vol. 6, pp. 114, 115, illus. 1891.

Treatment of grape diseases. Jour. Mycol., vol. 7, pp. 12–16, illus. 1891.

The improved Japy knapsack sprays. Jour. Mycol., vol. 7, pp. 39–41, illus. 1891.

A new pine leaf rust (*Coleosporium pini*). Jour. Mycol., vol. 7, p. 44. 1891.

A new method of treating grain by the Jensen process for the prevention of smut. Jour. Mycol., vol. 7, pp. 372, 373. 1894.

Report of the Chief of the Division of Vegetable Pathology. Ag. Rpt. 1892, pp. 215–246, illus.

Introduction—Field work of the year in treating plant diseases—Experiments in the treatment of rusts affecting wheat and other cereals—Experiments at Garrett Park, Md.—Supplementary experiments in the treatment of rust of wheat and other cereals at Garrett Park, Md.—Wheat rust experiments at Manhattan, Kans.—Experiments at Rockport, Kans.—Experiments in treating the disease of nursery stock—Work at Millikin, Md.—Work on black rot of the grape—Experiments in California in the treatment of fungi affecting the almond and prune—Destruction of lichens on pear trees by means of Bordeaux mixture—Miscellaneous experiments—Peach yellows and peach rosette—Investigations of the special agent in California—Work on pear blight, the pollination of pear and apple blossoms, etc.—Investigations in Florida upon citrus fruits and other sub-tropical plants—Work in the laboratory.

Report on the experiments made in 1891 in the treatment of plant diseases. Veg. Path. Bul. No. 3, pp. 76, illus. 1892 (?)

Suggestions in regard to the treatment of *Cercospora circumscissa*. Jour. Mycol., vol. 7, pp. 77, 78. 1892.

Report of the Chief of the Division of Vegetable Pathology. Ag. Rpt. 1893, pp. 245–276.

Introduction—Publications—Further investigations into the causes affecting the fruitfulness of pear and apple trees—Orchard work in the treatment of pear leaf-blight—Experiments in the treatment of black rot of the grape—A test of Bordeaux mixture of various strengths—Other experiments in the treatment of black rot—Treatment of leaf diseases affecting

Galloway, B. T.—Continued.

nursery stock—Additional experiments in the treatment of wheat rust—Potato diseases—Observation of the general effects of the macrosporium disease and its prevention—Work of fungicides—Bordeaux mixture—Work in Florida upon the diseases of citrus fruits and other subtropical plants—Orange blight—Die-back—Foot-rot—Scab—Sooty mold—Other diseases of citrus fruits—Investigation of plant diseases on the Pacific coast—Fruit-tree diseases—Walnut disease—Grape diseases—The peach yellows investigations—Miscellaneous work of the division.

Experiments in the treatment of rusts affecting wheat and other cereals. Jour. Mycol., vol. 7, pp. 195–226. 1893.

Report of the Chief of the Division of Vegetable Pathology. Ag. Rpt. 1894, pp. 143–150.

Laboratory investigations—Field work—Routine work—Outline of the work planned for the current fiscal year.

Report of the Chief of the Division of Vegetable Physiology and Pathology. Ag. Rpt. 1895, pp. 169–174.

Work of the division for the fiscal year ended June 30, 1895—Increased productiveness of plants sprayed with Bordeaux mixture—Diseases affecting greenhouse plants—Pear blight investigations—Melon diseases—Cereal diseases—Work at the subtropical laboratory—Work on the Pacific Coast—Exhibit for the Cotton States and International Exposition—Routine work—Outline of work planned for the current year.

Some destructive potato diseases: What they are and how to prevent them. F. B. No. 15, pp. 8, illus. 1894.

Some observations on new and old insecticides and their combination with fungicides. I. L., vol. 7, pp. 126–131. 1894.

The effect of spraying with fungicides on the growth of nursery stock. Veg. Path. Bul. No. 7, pp. 41, illus. 1894.

Frosts and freezes as affecting cultivated plants. Y. B. 1895, pp. 143–158, illus.

Kinds of frosts and freezes—How plants are affected—How to foretell frosts—Protection of plants from the injurious effects of frosts and freezes—Prevention of injuries to trees and other woody plants.

The health of plants in greenhouses. Y. B. 1895, pp. 247–256, illus.

Health and disease—The soil—Water, heat, and light—Selection as a means of increasing the vigor of plants.

Spraying for fruit diseases. F. B. No. 38, pp. 12, illus. 1896.

The pathology of plants: Lines of investigation that might be undertaken by experiment stations. E. S. R., vol. 7, pp. 725–735. 1896.

Report of the Chief of the Division of Vegetable Physiology and Pathology. Ag. Rpt. 1896, pp. 15–22.

Diseases of shade and ornamental trees—Work on the diseases of citrus fruits—Improving the orange—Pineapple diseases—Effects of the freeze of 1894–95 on vegetation in Florida—Work in California and other Pacific Coast States—Diseases affecting truck crops, cotton, etc., in the South—Work on greenhouse crops—Diseases of wheat and other cereals—Miscellaneous lines of work—Herbarium work—Outline of current work.

Report of the Chief of the Division of Vegetable Physiology and Pathology. Ag. Rpt. 1897, pp. 7–13.

Investigations of the diseases of forest and shade trees—Diseases affecting plants under glass—Studies of the diseases of melons and of cotton and other Southern crops—The diseases of pomaceous and allied fruits—Investigations of the diseases affecting fruits and other crops on the Pacific

Galloway, B. T.—Continued.

Coast—Work in Florida on citrus fruits and other subtropical plants—Cereals and cereal diseases—Experiments with fungicides—Nutrition of plants—Preparation and preservation of pathological specimens for permanent use—Preparation of an exhibit for the Tennessee Centennial Exposition—Bibliographical work—Preparation and publication of bulletins and papers—Investigations planned for the current year.

Testing varieties. O. E. S. Misc. Bul. No. 3, pp. 103-106. 1891.

Variety of testing in cereals: How can it be more decisive? O. E. S. Bul. No. 7, pp. 97, 98. 1892.

Hicks, Gilbert H.

Pure seed investigation. Y. B. 1894, pp. 389-408, illus.

Necessity of seed investigation and control—Abuses in the seed trade—Seed control in Europe—Methods of seed control—Germinating test—Equipment for seed investigations.

Oil-producing seeds. Y. B. 1895, pp. 185-204, illus.

General remarks—Flax—Castor-oil bean—European spurge—Sunflower—*Madia sativa*—Niger seed—Peanut—Sesame—Hemp—Rape—Poppy—Other oil-producing seeds.

Standards of the purity and vitality of agricultural seeds. Bot. Circ. No. 6, pp. 4. 1896.

Hicks, Gilbert H., and John C. Dabney.

The superior value of large heavy seed. Y. B. 1896, pp. 305-322, illus.

Introduction—Principles governing seed selection—Methods of selecting seed—Desirability of knowing the origin of seed—Manner of conducting seed selection experiments—Experiments with soja beans of different weight—Experiment with peas—Experiment with beans of different weight—Root development of plants from heavy and light seed—Relation of heavy seed to the early stages of plant growth.

The vitality of seed treated with carbon bisulphide. Bot. Circ. No. 11, pp. 5. 1897.

Hicks, Lewis E.

Report on the stratigraphy and hydrology of Nebraska, with reference to artesian wells for irrigation. S. Ex. Doc. No. 222, pp. 71-86, illus. 1890.

Hicks, Lewis E.—Continued.

On the underflow and sheet waters, irrigable lands, and geological structure of Nebraska, with its effect upon the water supply. S. Ex. Doc. No. 41, pt. 3, pp. 167–190, illus. 1892.

Hilgard, E. W.

The agriculture and soils of California. Ag. Rpt. 1878, pp. 476–507.

Irrigation—The climates—Soils of California—Natural pastures—Weeds—Forage crops—Stock breeding and dairying—Cereal crops—Miscellaneous field crops—Horticultural products—Grape culture and wine making.

A report on the relations of soil to climate. W. B. Bul. No. 3, pp. 59. 1892.

Report on the methods of physical and chemical soil analysis. Chem. Bul. No. 38, pp. 60–82. 1893.

Origin, value, and reclamation of alkali lands. Y. B. 1894, pp. 103–122, illus.

Occurrence and characteristics of alkali soil—How plants are injured by alkali—Effects of irrigation—Wick action of the soil—Determination of the distribution of the alkali salts—Composition of alkali salts—Utilization and reclamation of alkali lands—Will it pay to reclaim alkali soils?—Crops suitable for alkali lands.

The distribution of salts in alkali soils. O. E. S. Bul. No. 30, pp. 66–73, illus. 1896.

Late progress in soil analysis. O. E. S. Bul. No. 30, pp. 88–93. 1896.

The recognition of “nitrogen hungriness” in soils. Chem. Bul. No. 47, pp. 58–60. 1896.

Hilgard, E. W., T. C. Jones, and R. W. Furnas.

Climatic and agricultural features and the agricultural practice and needs of the arid regions of the Pacific Slope, with notes on Arizona and New Mexico. Unnum. rpt., pp. 182. 1882.

Hilgert, Henry.

Wine in New Mexico. Mo. Rpt. 1886, pp. 424, 425.

Hill, George G.

Marketing farm produce. F. B. No. 62, pp. 28, illus. 1897.

Hill, George William.

Report of the Chief of the Division of Records and Editing. Ag. Rpt. 1890, pp. 437–447.

Work of the division—The publications of the Department—Publications of the year.

Report of the Chief of the Division of Records and Editing. Ag. Rpt. 1891, pp. 489–501.

Publications of the year.

Report of the Chief of the Division of Records and Editing. Ag. Rpt. 1892, pp. 407–508.

Publications of the year—Expenditures for printing and binding.

Report of the Chief of the Division of Records and Editing. Ag. Rpt. 1893, pp. 395–408.

Farmers' Bulletins—Classification of publications—Serial publications—Distribution—The evil of unrestricted free distribution—Binding—Present cost of printing—Publications of the year.

Hill, George William—Continued.

Report of the Chief of the Division of Records and Editing. Ag. Rpt. 1894, pp. 171-184.

Work of the year—Cost of printing and binding—Duties devolving upon the division—Suggestions and recommendations—Estimates for fiscal year 1896—Orders of Secretary relating to Farmers' Bulletins and illustrations and engraving fund—Publications of the year.

Report of the Chief of the Division of Publications. Ag. Rpt. 1895, pp. 221-244.

Publications supervised—Farmers' Bulletins—The annual report—Change of name of division—Cost of printing and binding—Branch printing office—Illustrations—Miscellaneous work—Estimates for ensuing year—Distribution of Farmers' Bulletins—Sale of documents—Additional room—An advisory board—Publications of the year.

Report of the Chief of the Division of Publications. Ag. Rpt. 1896, pp. 29-70.

Publications supervised—Circulars of information—The yearbook—Index to the annual reports—Some objectionable sections in the printing bill—Branch printing office—Increase in printing fund needed—Sale of publications—Cost of printing and binding—Farmers' Bulletins—Illustrations and engravings—Securing illustrations without contract—The exhibit at the Atlanta Exposition—Distribution of documents—Growth of the work—Further recommendations—List of circulars of information—List of Farmers' Bulletins—List of publications turned over February 19, 1896, to the Superintendent of Documents, Union Building, Washington, D. C., and for sale by him—Publications issued during the year.

Report of the Chief of the Division of Publications. Ag. Rpt. 1897, pp. 25-91.

Publications supervised—The Yearbook—Index to the reports of the Statistician—Branch printing office—Cost of printing and binding—Number of publications issued by different divisions—Farmers' Bulletins—Document and folding room—Illustrations—Correspondence—Monthly list of publications—Methods of distribution—Sale of publications—Comparisons of expenses—Inadequacy of present appropriation—Need of a building—A section of illustrations—Disposal of money received for publications—Other amendments desired to law relating to public printing—A board of publications—Publications issued during the year—Report in detail of the distribution of documents from October 16, 1896, to June 30, 1897—Work done in branch printing office.

Hill, Robert T.

Imbibation of rocks. S. Ex. Doc. No. 53, pp. 215-221. 1891.

Hill, W. E.

Texas fever in Kansas. 12th and 13th Rpts. B. A. I., pp. 318-321. 1897.

Hill, W. T.

The trapping of sparrows for sporting purposes. O. and M. Bul. No. 1, pp. 178-191. 1889.

Hills, J. L.

What is the most profitable way to dispose of skim milk? O. E. S. Bul. No. 41, pp. 95-97. 1897.

Hines, C. M.

Investigation of swine plague. Spl. Rpt. No. 12, pp. 177-186. 1879.

Hinrichs, G.

Rainfall laws deduced from twenty years of observation. W. B. unnum. rpt., pp. 94, illus. 1893.

Hinton, Richard J.

Agriculture in Mexico. Rpt. Stat. 1884, pp. 27-88, map.

Area, population, and property—The food crops of Mexico—The fiber plants of Mexico—Mexican coffee, cacao, cotton, tobacco, and sugar—The gum trees of Mexico—Commercial and medicinal plants—The forest and other trees of Mexico—The fruits and flowers of Mexico—Mexican cattle and live stock—Old Mexican land measures and divisions—Water rights and measurements—Public lands and land laws of Mexico; rights in property of aliens; citizenship; prices of public lands—Mexican colonization and immigration.

Irrigation in the United States: Its extent and methods, with digest of laws governing water supply. Unnum. rpt., pp. 5-195. 1887.

Report of the special agent in charge of artesian and underflow investigations and of the irrigation inquiry. Ag. Rpt. 1890, pp. 471-488, illus.

Work of the investigation—Expert and field staff—The region east of the foothills—Conclusions of the supervising engineer—The geological reconnaissance and results—The Dakota artesian basin—The Dakota town wells—The central plains and the underflow region—The economic importance of the investigation—The year's progress in irrigation.

The proper location of artesian wells for irrigation purposes. S. Ex. Doc. No. 222, pp. 5-30, illus. 1890.

Report of the special agent in charge of the artesian and underflow investigations and of the irrigation inquiry. Ag. Rpt. 1891, pp. 439-450, illus.

Final work of the artesian and underflow investigation—The irrigation inquiry proper—Special well inquiry—Growth of irrigation—Office and map work.

Irrigation of the United States. (Progress report for 1890.) S. Ex. Doc. No. 53, pp. 11-136, illus. 1891.

Irrigation in Australia. S. Ex. Doc. No. 53, pp. 237-261. 1891.

A report on irrigation and the cultivation of the soil thereby. S. Ex. Doc. No. 41, pt. 1, pp. 5-54, map. 1892.

Some new parasites of the grain plant louse. I. L., vol. 2, pp. 246–248, illus. 1890.

Two spider-egg parasites. I. L., vol. 2, pp. 269–271, illus. 1890.

Additional note on spider-egg parasites. I. L., vol. 2, p. 359. 1890.

A North American Axima and its habits. I. L., vol. 2, pp. 365–367, illus. 1890.

The host relations of parasitic Hymenoptera. I. L., vol. 3, pp. 277–279. 1891.

A note on parasites. I. L., vol. 4, pp. 48, 49. 1891.

The larger cornstalk borer (*Diatraea saccharalis*). I. L., vol. 4, pp. 95–103, illus. 1891.

The methods of pupation among Chalcididae. I. L., vol. 4, pp. 193–196, illus. 1891.

Another spider-egg parasite. I. L., vol. 4, p. 202. 1891.

The habits of *Elasmua*. I. L., vol. 4, pp. 253, 254, illus. 1892.

A new *Icerya* parasite. I. L., vol. 4, pp. 378, 379. 1892.

An experiment against mosquitoes. I. L., vol. 5, pp. 12–14. 1892.

A new enemy to timothy grass. I. L., vol. 5, pp. 90–92, illus. 1892.

The San Jose scale: Its appearance in the Eastern United States; measures to be taken to prevent its spread and to destroy it. Ent. Circ. No. 3, 2d s., pp. 10, illus. 1893.

The Angoumois grain moth, or "fly weevil" (*Gelechia cerealella*). I. L., vol. 5, pp. 325–328. 1893.

Notes on methods of studying life histories of injurious insects. I. L., vol. 6, pp. 82–89. 1893.

Another mosquito experiment. I. L., vol. 6, pp. 90, 91. 1893.

Report of the Entomologist. Ag. Rpt. 1894, pp. 157–159.

Some scale insects of the orchard. Y. B. 1894, pp. 249–276, illus.

Introductory—Life history and habits of scale insects in general—Classification—Species to be considered—Natural enemies of scale insects—The oyster-shell bark louse—The scurfy bark louse—The greedy scale—The English walnut scale—The new peach scale—The San Jose or pernicious scale—The peach lecanium—The New York lecanium—Remedies for orchard scales—Preventives—Inspection and quarantine laws.

Howard, L. O.—Continued.

The carpet beetle, or "buffalo" moth (*Anthrenus scrophulariæ*). Ent. Circ. No. 5, 2d s., pp. 4, illus. 1894.

The army worm (*Leucania unipuncta*). Ent. Circ. No. 4, 2d s., pp. 5, illus. 1894.

The hymenopterous parasites of the California red scale. I. L., vol. 6, pp. 227-236, illus. 1894.

Completed life history of the sugar-beet webworm (*Loxostege sticticalis*). I. L., vol. 6, pp. 369-373, illus. 1894.

Two parasites of important scale insects. I. L., vol. 7, pp. 5-8, illus. 1894.

An abnormal tiger swallowtail. I. L., vol. 7, pp. 44-47, illus. 1894.

A brief account of the rise and present condition of official economic entomology. I. L., vol. 7, pp. 55-108. 1894.

The United States (by States), Canada, European countries, Ireland, Germany, Austria-Hungary, Italy, France, Spain, Netherlands, Norway, Sweden, Russia, Finland, South America, India, South Africa, Australia, British West Indies, New Zealand, Hawaiian Republic—Bibliographical list of entomological publications of the State agricultural experiment stations organized under the Hatch act.

The Eastern occurrences of the San Jose scale. I. L., vol. 7, pp. 153-163. 1894.

Damage by the American locust. I. L., vol. 7, pp. 220-229, illus. 1894.

The maple Pseudococcus (*Pseudococcus aceris*). I. L., vol. 7, pp. 235-240, illus. 1894.

A new parasite of *Mytilaspis pomorum*. I. L., vol. 7, p. 256. 1894.

Report of the Entomologist. Ag. Rpt. 1895, pp. 153-157.

Further notes on the San Jose scale. I. L., vol. 7, pp. 283-295, illus. 1895.

Injurious insects and commerce. I. L., vol. 7, pp. 332-338. 1895.

A migration of cockroaches. I. L., vol. 7, p. 349. 1895.

The beet-leaf Pegomyia (*Pegomyia vicina*). I. L., vol. 7, pp. 379-381, illus. 1895.

An injurious parasite. I. L., vol. 7, pp. 402-404, illus. 1895.

The shade-tree insect problem in the United States. Y. B. 1895, pp. 361-384, illus.

The imported elm-leaf beetle—The white-marked tussock moth—The fall webworm—General work against shade-tree insects in cities and towns.

Revision of the Aphelininæ of North America, subfamily of hymenopterous parasites of the family Chalcididæ. Ent. Bul. No. 1, t. s., pp. 44, illus. 1895.

The Mexican cotton-boll weevil (*Anthonomus grandis*). Ent. Circ. No. 6, 2d s., pp. 5, illus. 1895.

The harlequin cabbage bug, or calico back (*Murgantia histrionica*). Ent. Circ. No. 10, 2d s., pp. 2, illus. 1895.

Howard, L. O.—Continued.

Legislation against injurious insects: A compilation of the laws and regulations in the United States and British Columbia. Ent. Bul. No. 33, pp. 46. 1895.

Report of the Entomologist. Ag. Rpt. 1896, pp. 89–93.

The insects which affect the cotton plant in the United States. O. E. S. Bul. No. 33, pp. 317–350, illus. 1896.

Some shade-tree insects of Springfield and other New England cities. Ent. Bul. No. 2, n. s., pp. 40–47, 1896.

The grass and grain jointworm flies and their allies: A consideration of some North American phytophagic Eurytominae. Bul. No. 2, t. s., pp. 24, illus. 1896.

Mosquitoes and fleas. Ent. Bul. No. 4, n. s., pp. 9–31, illus. 1896.

Some insects affecting cheese, hams, fruit, and vinegar. Ent. Bul. No. 4, n. s., pp. 100–111, illus. 1896.

Some temperature effects on household insects. Ent. Bul. No. 6, n. s., pp. 13–17. 1896.

On the futility of trunk and crown washing against the elm leaf-beetle. Ent. Bul. No. 6, n. s., pp. 36–38. 1896.

Mosquitoes and fleas. Ent. Circ. No. 13, 2d s., pp. 4. 1896.

General work against insects which defoliate shade trees in cities and towns. Ent. Circ. No. 15, 2d s., pp. 4. 1896.

The Mexican cotton-boll weevil (*Anthonomus grandis*). Ent. Circ. No. 14, 2d s. (Revision of No. 6), pp. 8, illus. 1896.

The larger cornstalk borer (*Diatraea saccharalis*). Ent. Circ. No. 16, 2d s., pp. 3, illus. 1896.

The use of steam apparatus for spraying. Y. B. 1896, pp. 69–88.

General remarks—Machines for orchard spraying—Machines for spraying shade trees in cities and towns—Conclusions.

Report of the Entomologist. Ag. Rpt. 1897, pp. 111–116.

A study in insect parasitism: A consideration of the parasites of the white-marked tussock moth, with an account of their habits and interrelations, and with descriptions of new species. Ent. Bul. No. 5, t. s., pp. 57, illus. 1897.

Some insects affecting the hop plant. Ent. Bul. No. 7, n. s., pp. 40–51, illus. 1897.

A case of excessive parasitism. Ent. Bul. No. 7, n. s., pp. 62, 63. 1897.

Additional observations on the parasites of *Orgyia leucostigma*. Ent. Bul. No. 9, n. s., pp. 15–18. 1897.

Temperature experiments as affecting received ideas on the hibernation of injurious insects. Ent. Bul. No. 9, n. s., pp. 18, 19. 1897.

The gipsy moth in America: A summary account of the introduction and spread of *Porthetria dispar* in Massachusetts and of the efforts made by the State to repress and exterminate it. Ent. Bul. No. 9, n. s., pp. 39, illus. 1897.

A compilation of analyses of American feeding stuffs. O. E. S. Bul. No. 11, pp. 155. 1892.

Jenkins, Thornton A.

The culture of colza and rape for oil. Ag. Rpt. 1853, pp. 226-231.

Jenter, C. G.

Results obtained in standardizing the more common acid and alkali solutions. Chem. Bul. No. 38, pp. 43-45. 1893.

Jewell, L. E.

The determination of the relative quantities of aqueous vapor in the atmosphere by means of the absorption lines of the spectrum. W. B. Bul. No. 16, pp. 12, illus. 1896.

Jewett, S. Wright.

[Report on farm crops, etc., in Vermont.] Ag. Rpt. 1852, pp. 141-143.

Johns, Urban E.

[Report on farm crops, etc., in Kentucky.] Ag. Rpt. 1850, pp. 277, 278.

[Report on farm crops, etc., in Kentucky.] Ag. Rpt. 1852, pp. 314-316.

Johnson, Alfred C.

[Report on the commerce of Stuttgart, Germany.] For. Mkts. Bul. No. 2, pp. 64-68. 1895.

Animals, cereals, fresh meats, cotton, wheat products, tobacco, fresh fruits and vegetables, wines.

Johnson, A. L.

Economical designing of timber trestle bridges. For. Bul. No. 12, pp. 57. 1896.

Johnson, B. P.

[Report on farm crops, etc., in New York.] Ag. Rpt. 1847, pp. 362-368.

Paragraphs on wheat, barley, oats, buckwheat, corn, potatoes, hay, flax, tobacco, silk, sugar, rotation of crops, root crops, pease and beans, fruit, dairies, stock, sheep, wool depots, manures, draining, with extracts of reports from various counties in New York.

Johnson, B. P.—Continued.

[Report on agricultural products, etc., of New York.] Ag. Rpt. 1848, pp. 370-401.

Johnson, Edmund.

Agriculture of Tuspan, in Mexico. Mo. Rpt. 1874, pp. 498-501.

Johnson, H. S.

[Report on farm crops, etc., in New York.] Ag. Rpt. 1848, pp. 414-418.

[Remarks on dairy cows, etc., in New York.] Ag. Rpt. 1850, pp. 120-128.

Johnson, J. B.

Work [in timber physics] at the test laboratory at St. Louis, Missouri. For. Bul. No. 6, pp. 31-41, illus. 1892.

Mechanical tests made at Washington University testing laboratory, St. Louis, Missouri. [Timber physics]. For. Bul. No. 8, pp. 3-13, illus. 1893.

Results of mechanical tests. [Timber physics.] For. Bul. No. 8, pp. 22-31, illus. 1893.

Johnson, J. E.

[Report on farm crops, etc., in Iowa.] Ag. Rpt. 1852, pp. 340, 341.

Johnson, Lawrence.

Report upon the cotton worm, bollworm, and other insects. Ent. Bul. No. 1, pp. 53-58. 1883.

Johnson, M.

[Report on farm crops, etc., in New Jersey.] Ag. Rpt. 1851, pp. 668-671.

Johnson, R. E.

Weights and measures. Mo. Rpt., Nov.-Dec., 1864, pp. 19-22.

Johnson, S. W.

[Presidential address before the Association of American Agricultural Colleges and Experiment Stations.] O. E. S. Bul. No. 41, pp. 43-46. 1897.

Johnson, Willis G.

Notes on some little-known insects of economic importance. Ent. Bul. No. 9, n. s., pp. 83-85. 1897.

Notes from Maryland on the principal injurious insects of the year. Ent. Bul. No. 9, n. s., pp. 80, 82. 1897.

Notes on new and old scale insects. Ent. Bul. No. 6, n. s., pp. 74-78. 1896.

Entomological notes from Maryland. Ent. Bul. No. 6, n. s., pp. 63-66. 1896.

Johnston, A. T.

[Report on farm crops, etc., in Georgia.] Ag. Rpt. 1851, pp. 322, 323.

Johnstone, Edward.

[Report on farm crops, etc., in Iowa.] Ag. Rpt. 1850, pp. 355, 356.

Jones, A. C.

Thea viridis, or Chinese tea plant, and the practicability of its culture and manufacture in the United States. Spl. Rpt. No. 3, pp. 5-14. 1877.

Jones, Frank M.

Dermestes vulpinus in goatskins. I. L., vol. 2, pp. 63, 64, illus. 1889.

Jones, Henry B.

[Report on farm crops, etc., in Virginia.] Ag. Rpt. 1851, pp. 283-291.

Jones, J.

[Report on farm crops, etc., in Delaware.] Ag. Rpt. 1847, pp. 368-372.

[Report on farm crops, etc., in Delaware.] Ag. Rpt. 1848, pp. 461-467.

Jones, J. D.

Cork oak. For. Bul. No. 11, pp. 9-18. 1895.

History and statistics—Botanical—Harvest—Preparation for market.

Jones, J. L.

The mule: Its uses, how to breed, grow, prepare for the market, and sell. 8th and 9th Rpts. B. A. I., pp. 335-342. 1893.

Jones, L. R.

A comparative test of fungicides in checking potato blight and rot. O. E. S. Bul. No. 16, pp. 89-91. 1893.

Jones, R. W.

Report of observations and experiments on the cotton worm (*Aletia xyliana*). Ent. Bul. No. 1, pp. 47-51. 1883.

Experiments on the eggs—Tachinæ and ichneumons—Bollworms—Preparations for destroying the worms—Paris green—Pyrethrum.

The cotton bollworm (*Heliothis armiger*) and cotton army worm (*Aletia xyliana*). 4th Rpt. Ent. Com., pp. 17-23, appx. ii. 1885.

Jones, T. C., E. W. Hilgard, and R. W. Furnas.

Climatic and agricultural features and the agricultural practice and needs of the arid regions of the Pacific Slope, with notes on Arizona and New Mexico. Unnum. rpt., pp. 182. 1882.

Jones, William J.

Origin, habits, and destructive tendencies of *Aletia xyliana*. 4th Rpt. Ent. Com., pp. 55-57, appx. vi. 1885.

[Report on cotton insects.] Cot. Insects, pp. 356-358. 1879.

Jones, W. J., jr., and H. A. Huston.

Action of ammonium citrate and citric acid on basic slag. Chem. Bul. No. 49, pp. 68-71. 1897.

Jordan, W. H.

American digestion experiments. E. S. R., vol. 6, pp. 5-8. 1894.

Dietary studies at the Maine State College in 1895. O. E. S. Bul. No. 37, pp. 57. 1897.

The college commons and the conditions under which the experiments were made—The questions studied—The analyses of the raw materials, cooked foods, and wastes—The cost of raw materials—Data obtained in the dietary studies—Dietary study under ordinary conditions—Study of a dietary containing expensive protein—Study of a dietary containing cheap protein—Study of a dietary containing limited milk supply—Study of a dietary containing a large amount of milk—Discussion of the investigation and its result—Summary.

21713—No. 4—10

Judd, N. B.

Wheat growing in Prussia. Ag. Rpt. 1861, pp. 404-411.

Frankenstein wheat—Cujawischer wheat—The cultivation of wheat in Prussia—Climate and soil—Tillage—Winter wheat—Harvest—Yield of corn and straw—General remarks.

Judd, Sylvester D.

Four common birds of the farm and garden. Y. B. 1895, pp. 405-418, illus.

Cat-bird, brown thrasher, mocking bird, house wren.

Outbreak of anthrax in New Mexico. Spl. Rpt. No. 34, pp. 317-319. 1881.

Nonexistence of foot-and-mouth disease in the West. Spl. Rpt. No. 34, pp. 319, 320. 1881.

McMahon, B.

The American gardener's calendar. Ag. Rpt. 1866, pp. 105-106.

McMurtrie, William.

Chemical memoranda. Mo. Rpt. 1873, pp. 31-33.

Mineral fertilizer—The mesquite—Use of sulphurous acid in manufacture of alcohol—Sulphurous oxide on vegetation—Indigo carmine in sugar manufacture—Liquid glue—*Laurus* a febrifuge—*Eucalyptus globulus*.

Chemical memoranda. Mo. Rpt. 1873, pp. 113-115.

Analysis of corn—Beet root—Reduced or reverted phosphates—Preservatives—Artificial milk—Ceraline.

Chemical memoranda. Mo. Rpt. 1873, pp. 167-171.

Proximate analysis—Sugar beets—Lunar light upon vegetation—New coloring matter—Phizoctone—Lacquer—Freezing of plants.

Chemical memoranda. Mo. Rpt. 1873, pp. 240-246.

Analysis of wines—Marls—Muck—Fertilizers—Sugar—*Agaricus foetens*—Tobacco—Growth of trees—Tanning mixture—Effect of manures upon cinchonas—Heating of wines—*Eucalyptus globulus*—A new cement—Sugars of the third crystallization.

Chemical notes. Mo. Rpt. 1873, pp. 351-354.

Nitrogenous wastes—A new opium—Action of coffee—Cleaning wool—Purification of sugar by osmosis—Cause of intermittent fevers—Coal ashes—Animal farina (new food for beasts)—Alcohol in bread.

Chemical memoranda. Mo. Rpt. 1873, pp. 499-503.

Greensand marl—Opium from North Carolina—Flesh meal—Disease of beach trees—Atmospheric nitrogen in vegetation.

Report of the Chemist. Ag. Rpt. 1873, pp. 170-183.

Fertilizers—Analysis of wines—Opium from North Carolina—Soil analyses—Proximate analysis of cereals—Tannic acid, its determination, and the percentage found in some woods of the Southwest.

Report of the chemist. Ag. Rpt. 1874, pp. 147-155.

Southern fodder plants.

Chemical memoranda. Mo. Rpt. 1874, pp. 46-50.

Soil analysis—Exhalation of moisture by plants—Ammonia and nitric acid: their relative value in agriculture.

McMurtrie, William—Continued.

Chemical memoranda. Mo. Rpt. 1874, pp. 148-151.

Methods of determining tannic acid—Experiments with beets—Extraction of crystallizable sugar from molasses—Strange growth of potatoes.

Chemical memoranda. Mo. Rpt. 1874, pp. 222-226.

Analysis of hominy—Passage of matter in plants—Liberation of ozone by plants—Sausages colored with fuchsin—Chemical properties of uredo—Tannic acid as a wood preservative.

Chemical memoranda. Mo. Rpt. 1874, pp. 376-379.

Castor plant—Artificial production of indigo—Use of paris green—Sugar contained in vine leaves—A soluble modification of starch—Production of ozone by oxidation of volatile hydrocarbons.

Chemical memoranda. Mo. Rpt. 1874, pp. 431-438.

Curious deposit of phosphatic material—Influence of forests upon rainfall—Peterson's method of meadow culture—Quantity of water consumed in growth of wheat.

Chemical memoranda. Mo. Rpt. 1874, pp. 507-512.

Paris green: Its use in agriculture—Aluminum in plants—Sulphocyanic acid poisonous to plants—What is an ameliorating culture?

Report of the Chemist. Ag. Rpt. 1875, pp. 141-151, illus.

Chemical memoranda. Mo. Rpt. 1875, pp. 123-127.

Analysis of limestone—Analysis of *Gallega officinalis*.

Sugar corn [analysis]. Mo. Rpt. 1875, pp. 176, 177.

Chemical memoranda. Mo. Rpt. 1875, pp. 231-234, illus.

Transmission of paris green to the soil—Hastening germination.

Chemical memoranda. Mo. Rpt. 1875, pp. 310-313, illus.

The influence of illuminating gas upon the aerial portions of plants—Liberation of carbonic acid by respiration and perspiration of various animals under different conditions—Chemical relation of the alkalies contained in ashes of plants.

Chemical memoranda. Mo. Rpt. 1875, pp. 580-585.

Bat excrement—Ditaine (new substitute for quinine)—Digestibility of phosphoric acid and lime by animals—Manganese in beech leaves—Effect of street gas upon vegetation—Freezing wines—Nitrification of soils—Respiration by submerged aquatic vegetation—*Eucalyptus globulus*.

Chemical memoranda. Mo. Rpt. 1876, pp. 39-45.

American opium—"Poisoned" soils of Texas—Fixation of atmospheric nitrogen in the soil—Phosphoric acid as an indicator of the fertility of soils—Nitrogen and ammonia in beets—Irrigation.

Chemical memoranda. Mo. Rpt. 1876, pp. 192-195.

Bat guano—Influence of lime salts in plant growth.

Chemical memoranda. Mo. Rpt. 1876, pp. 458, 459.

Bat guano—American tanning materials—American wines—Fixation of nitrogen by the influence of atmospheric electricity—New fever cure (*Croton adenaster*)—Formation of carbohydrates in plants—Alcohol in plants—Germination of seeds in nitrous oxide—Influence of plant secretions upon putrefaction—Influence of boracic acid and borates upon vegetation.

Report of the Chemist. Ag. Rpt. 1876, pp. 46-61.

Bat guanos found in caves in the Southern States—American tanning materials—American wines—*Mesembryanthemum crystallinum*—*Suaeda californica*—Greensand marl.

Report of the Chemist. Ag. Rpt. 1877, pp. 65-89.

Investigation to determine the presence or absence of the so-called peptone-forming ferment in roots—American sumac—On the conditions in nature which may influence or tend to the production of mildew and rot.

McMurtrie, William—Continued.

Report on the culture of sumac in Sicily and its preparation for market in Europe and the United States. Spl. Rpt. No. 26, pp. 32, illus. 1880.

Report on the culture of the sugar beet and the manufacture of sugar therefrom in France and the United States. Spl. Rpt. No. 28, pp. 294, illus. 1880.

Report upon statistics of grape culture and wine production in the United States for 1880. Spl. Rpt. No. 36, pp. 39. 1881.

On the mineral nutrition of the vine for the production of wine. Unnum. rpt., pp. 180-187, in "Proceedings." 1882.

Report on the examination of raw silks. Ent. Bul. No. 3, pp. 56-72, illus. 1883.

Description of the material—Object of the examination—Preparation of the material for examination—Measurements of fineness—Measurements of strength and stretch.

Report upon an examination of wools and other animal fibers. Unnum. rpt., pp. 613, illus. 1886.

McNaill, D. W.

Experiments in wheat culture. Ag. Rpt. 1845, pp. 430-432.

The Hessian fly (*Cecidomyia destructor*). Ent. Circ. No. 12, 2d s., pp. 4. 1895.

Insect control in California. Y. B. 1896, pp. 217–236, illus.

General remarks—Cultural and climatic conditions—System of inspection and quarantining—The worst scale insects of California—The imported parasitic and predaceous enemies of scale insects—Control of insects by the use of washes and by fumigation—Insecticide machinery—Conclusion.

Notes on insecticides. Ent. Bul. No. 2, n. s., pp. 19–26. 1896.

The elm leaf-beetle in Washington, District of Columbia. Ent. Bul. No. 2, n. s., pp. 47–50. 1896.

Species [insects] injurious to wall paper, books, timbers, etc. Ent. Bul. No. 2, n. s., pp. 70–83, illus. 1896.

Revision of the Nematinae of North America, a subfamily of the leaf-feeding Hymenoptera of the family Tenthredinidæ. Ent. Bul. No. 3, t. s., pp. 135, illus. 1896.

The bedbug and cone nose. Ent. Bul. No. 4, n. s., pp. 32–42, illus. 1896.

Cockroaches and house ants. Ent. Bul. No. 4, n. s., pp. 84–99, illus. 1896.

Marlatt, C. L.—Continued.

Comparative tests with new and old arsenicals on foliage and with larvæ. Ent. Bul. No. 6, n. s., pp. 30–35. 1896.

The peach tree borer (*Sannina exitiosa*). Ent. Circ. No. 17, 2d s., pp. 4, illus. 1896.

Insecticide soaps. Ent. Bul. No. 6, n. s., pp. 38–41. 1896.

Notes on insecticides. Ent. Bul. No. 9, n. s., pp. 54–63. 1897.

Soaps as insecticides—Resin washes or compounds—Pure kerosene—Use of kerosene emulsion in California—Lime, salt, and sulphur wash—Hydrocyanic acid gas—Steam and superheated water—Arsenicals and lime.

The clover mite (*Bryobia pratensis*). Ent. Circ. No. 19, 2d s., pp. 4, illus. 1897.

The woolly aphis of the apple (*Schizoneura lanigera*). Ent. Circ. No. 20, 2d s., pp. 6, illus. 1897.

The buffalo tree hopper (*Ceresa bubalus*). Ent. Circ. No. 23, 2d s., pp. 4, illus. 1897.

The ox warble (*Hypoderma lineata*). Ent. Circ. No. 25, 2d s., pp. 10, illus. 1897.

The pear slug (*Eriocampoides limacina*). Ent. Circ. No. 26, 2d s., pp. 7, illus. 1897.

Marlatt, C. L., and L. O. Howard.

The San Jose scale: Its occurrence in the United States, with a full account of its life history and the remedies to be used against it. Ent. Bul. No. 3, n. s., pp. 80, illus. 1896.

House flies, centipedes, and other insects that are annoying rather than directly injurious. Ent. Bul. No. 4, n. s., pp. 43–57, illus. 1896.

Species [insects] injurious to woolen goods, clothing, carpets, upholstery, etc. Ent. Bul. No. 4, n. s., pp. 58–69, illus. 1896.

Marlatt, C. L., and C. V. Riley.

The clover mite (*Bryobia pratensis*). I. L., vol. 3, pp. 45–52, illus. 1890.

Wheat and grass sawflies. I. L., vol. 4, pp. 168–179, illus. 1891.

Report of the Ornithologist and Mammalogist. Ag. Rpt. 1886, pp. 227-258.

Importance of the subject—The Pennsylvania "scalp act" of 1885—Progress of the work—List of circulars—The English sparrow: introduction of the English sparrow; rate of increase of the sparrow; method of diffusion of the sparrow; rate of spread of the sparrow, and extent of area occupied at the close of the year 1886; the sparrow an enemy of our native birds; the sparrow an enemy to the gardener and fruit grower; the sparrow an enemy to grape culture; the sparrow an enemy to the grain-grower; effect on architecture and defilement of buildings; failure of the sparrow as an insect destroyer; English sparrows cause an increase in the number of caterpillars; recommendations for legislation; recommendations to the people; the sparrow as an article of food—Ravages of rice birds—The distribution and migration of birds—Effects of mammals upon agriculture—Rabbits—The importation of exotic species should be governed by law.

Report of the Ornithologist and Mammalogist. Ag. Rpt. 1887, pp. 399-456.

Statement of work done—Special reports—Food of hawks and owls—Experiments in poisoning—Poisons used in experiments—Poisons recommended—General suggestions—Precautions—Synopsis of experiments—Report on some of the results of a trip through parts of Minnesota and Dakota—Blackbirds—Mammals—Description of localities visited by Vernon Bailey during the summer of 1887—Blackbirds—Gophers.

Report of the Ornithologist and Mammalogist. Ag. Rpt. 1888, pp. 477-536, illus.

Scope of the work—Methods of inquiry—Statement of work done in 1888—Cincinnati exposition—The geographical distribution of species—Special reports—Introduced pheasants—Pacific Coast region—The mink (*Lutreola vison*)—The sparrow hawk (*Falco sparverius*)—The short-eared owl (*Asio accipitrinus*)—The food of crows—Distribution of the crow—Injury to Indian corn, wheat, and other cereals—Injury to other cereals than corn—Damage to other crops—Other vegetable food of the crow—The distribution of noxious seeds—The crow as a destroyer of the eggs and young of poultry and wild birds—Destruction of the eggs and young of poultry—Destruction of eggs and young of wild birds—Insect food of the crow—The crow as an enemy to grasshoppers—Do crows eat potato beetles?—The insect food of the crow as revealed by examination of stomachs—The crow as an enemy to field mice and other small quadrupeds—Miscellaneous animal food of the crow—The crow as a scavenger—Food of the fish crow—Summary of evidence from all sources—Results in detail of the examination of the stomach of the common crow (*Corvus americanus*)—Result in detail of the examination of the stomach of the fish crow (*Corvus ossifragus*)—The rose-breasted grosbeak (*Habia ludoviciana*)—An enemy of the Colorado beetle, or potato bug.

Merriam, C. Hart—Continued.

Report of the Ornithologist and Mammalogist. Ag. Rpt. 1889, pp. 363-376, illus.

Section of geographic distribution—Character and object of the inquiry—Restrictions imposed by Congress—Urgent recommendations—Work of the year—Bird migration—Identification of specimens—Section of economic relations—Gopher investigation—The English sparrow bulletin—Hawk and owl bulletin—The crow—The crow blackbird—Potato-bug birds—Seed collection—Collection of bird stomachs—Marsh hawk (*Circus hudsonius*)—Common screech owl (*Megascops asio*)—Frammulated screech owl (*Megascops flammeolus*).

Revision of the North American pocket mice. N. A. Fauna No. 1, pp. 36, illus. 1889.

Descriptions of two new species and one new subspecies of grasshopper mouse, with a diagnosis of the genus *Onychomys*, and a synopsis of the species and subspecies. N. A. Fauna No. 2, pp. 1-5. 1889.

Description of a new marmot from the Black Hills of Dakota. N. A. Fauna No. 2, pp. 7-9. 1889.

Description of a new species of pika (*Lagomys schisticeps*) from the Sierra Nevada Mountains in California. N. A. Fauna No. 2, pp. 11-13. 1889.

Description of a new spermophile from southern California. N. A. Fauna No. 2, pp. 15, 16. 1889.

Description of a new spermophile from northwestern Arizona. N. A. Fauna No. 2, p. 17. 1889.

Description of a new species of ground squirrel from the arid lands of the Southwest. N. A. Fauna No. 2, pp. 19-21. 1889.

Description of a new species of free-tailed bat from the desert region of southern California. N. A. Fauna No. 2, p. 23, illus. 1889.

Description of a new species of free-tailed bat from the Lower Colorado River in Arizona. N. A. Fauna No. 2, p. 25, illus. 1889.

Description of a new genus (*Phenacomys*) and four new species of Arvicolinae. N. A. Fauna No. 2, pp. 27-35, illus. 1889.

Report of the Ornithologist and Mammalogist. Ag. Rpt. 1890, pp. 227-285.

Work of the year—Section of geographic distribution—Section of economic relations—Collections of the Division—Identification of specimens—Seed planting by birds—Birds which feed on mulberries.

Results of a biological survey of the San Francisco Mountain region and desert of the Little Colorado in Arizona. N. A. Fauna No. 3, pp. 1-4, illus. 1890.

Part I—General results of biological survey of the San Francisco Mountain region in Arizona, with special reference to the distribution of species. N. A. Fauna No. 3, pp. 5-34. Part II—Grand Canyon of the Colorado, between the Kaibab and Cocanini plateaus. N. A. Fauna No. 3, pp. 35-41. Part III—Annotated list of mammals of the San Francisco Mountain plateau and desert of the Little Colorado in Arizona, with notes on their vertical distribution, and descriptions of new species. N. A. Fauna No. 3, pp. 43-86, illus. Part IV—Annotated list of birds of the San Francisco Mountain plateau and the desert of the Little Colorado River, Arizona. N. A. Fauna No. 3, pp. 87-101.

21713—No. 4—12

Merriam, C. Hart—Continued.

Part V—Annotated list of reptiles and batrachians collected by Dr. C. Hart Merriam and Vernon Bailey on the San Francisco Mountain plateau and desert of the Little Colorado, Arizona, with descriptions of new species. N. A. Fauna No. 3, pp. 103-118. 1890.

Forest trees of the San Francisco Mountain region, Arizona. N. A. Fauna No. 3, pp. 119-123. 1890.

Relation of a biological survey to agriculture. N. A. Fauna No. 3, pp. 125, 126. 1890.

Contribution toward a revision of the little striped skunks of the genus *Spilogale*, with descriptions of seven new species. N. A. Fauna No. 4, pp. 1-15, illus. 1890.

Descriptions of five new ground squirrels of the genus *Tamias*. N. A. Fauna No. 4, pp. 17-22. 1890.

Description of a new *Evotomys* from Colorado. N. A. Fauna No. 4, pp. 23, 24, illus. 1890.

Descriptions of two new species of *Evotomys* from the Pacific Coast region of the United States. N. A. Fauna No. 4, pp. 25, 26. 1890.

Description of a new marten (*Mustela caurina*) from the northwest coast region of the United States. N. A. Fauna No. 4, pp. 27-29. 1890.

Description of a new species of *Molussus* from California (*Molussus californicus*). N. A. Fauna No. 4, pp. 31, 32. 1890.

Description of a new prairie dog from Wyoming. N. A. Fauna No. 4, pp. 33-35. 1890.

Descriptions of three new ground squirrels of the *Spermophilus spilosoma* group. N. A. Fauna No. 4, pp. 37-39. 1890.

Descriptions of three new kangaroo rats, with remarks on the identity of *Dipodomys ordii* of Woodhouse. N. A. Fauna No. 4, pp. 41-49. 1890.

Description of a new pocket gopher of the genus *Geomys* from western Nebraska. N. A. Fauna No. 4, p. 51. 1890.

Description of a new species of *Hesperomys* from southern Florida. N. A. Fauna No. 4, pp. 53-54. 1890.

Report of the Ornithologist and Mammalogist. Ag. Rpt. 1891, pp. 267-271.

Work of the year—Section of geographic distribution—Section of economic relations.

Report of the Ornithologist and Mammalogist. Ag. Rpt. 1892, pp. 181-200, illus.

Work of the year—Office work—Field work—Exhibit at the World's Columbian Exposition—Notes on some of the spermophiles and pocket gophers of the Mississippi Valley—Economic ornithology—Food habits of the cedar bird (*Ampelis cedrorum*).

Report of the Ornithologist and Mammalogist. Ag. Rpt. 1893, pp. 227-234, illus.

Work of the year—Scope of the work—Geographic distribution—Method of work—Biological surveys—Field work in 1893—Economic relations—Exhibit at the World's Columbian Exposition—Food habits of the king-bird, or bee martin.

Merriam, C. Hart—Continued.

Notes on the geographic and vertical distribution of cactuses, yuccas, and agaves in the deserts and desert ranges of southern California, southern Nevada, northwestern Arizona, and southwestern Utah. N. A. Fauna No. 7, pp. 345-359. 1893.

Notes on the distribution of trees and shrubs in the deserts and desert ranges of southern California, southern Nevada, northwestern Arizona, and southwestern Utah. N. A. Fauna No. 7, pp. 285-343. 1893.

The geographic distribution of animals and plants in North America. Y. B. 1894, pp. 203-214, illus.

Importance of knowledge of the geographic distribution of species—An experimental biological survey—Provision for a systematic biological survey—The Death Valley Expedition—Correlation of the life zones—Recent field work—The seven life zones of North America—Fundamental principles of animal and plant distribution—Recapitulation.

Report of the Chief of the Division of Ornithology and Mammalogy. Ag. Rpt. 1894, pp. 167-169.

Work on geographic distribution—The study of jack rabbits and pocket gophers—Routine work—Proposed work.

Report of the Chief of the Division of Ornithology and Mammalogy. Ag. Rpt. 1895, pp. 175-178.

Work of the year—Geographic distribution—Stomach examinations—Other technical work—Bounties—Cotton States and international expositions—Routine work—Outline of work for 1895-96.

Monographic revision of the pocket gophers (family Geomyidæ, exclusive of the species thomomys). N. A. Fauna No. 8, pp. 258, illus. 1895.

Report of the Chief of the Division of Ornithology and Mammalogy. Ag. Rpt. 1896, pp. 23-25.

Geographic distribution—Cereal investigation—Laboratory work—Identification of specimens—Nashville Exposition—Publications—Bird day in the schools—Routine work—Plans for the year.

Report of the Chief of the Division of Biological Survey. Ag. Rpt. 1897, pp. 15-20.

Geographic distribution—Cereal investigation—Laboratory work—Identification of specimens—Nashville Exposition—Publications—Bird day in the schools—Routine work—Plan for the fiscal year ending June 30, 1898—Plans for the fiscal year ending June 30, 1899.

The type or systematic collection—The exhibit collection—Drawers and cases—Arrangement of biological material.

Report of the Entomologist. Ag. Rpt. 1891, pp. 231–266.

Introduction—The work of the season—A new insectary—The fluted scale and the Australian ladybird—Importation of European parasites of the Hessian fly and the imported cabbage worm—The gypsy moth and its parasites—Damage by the larger cornstalk and the sugar-cane borer—Spread of the horn fly—Hot water for the rose chafer—*Lachnosterna* experiments—Experiments with dormant scale insects—Scientific meetings at Washington—The bollworm investigation—Apiculture—Other investigations—Work of the field agents—Destructive locusts—Eastern Colorado—Idaho—The Red River Valley of North Dakota, Minnesota, and Manitoba—Kansas—Texas, New Mexico, and Arizona—California—Insecticides—Food poisons—Caution necessary in the use of these insecticides—Insecticides which destroy by direct contact—Fertilizers as insecticides—The gas treatment for scale insects.

Destructive locusts. A popular consideration of a few of the more injurious locusts (or “grasshoppers”) for the United States, together with the best means of destroying them. Ent. Bul. No. 25, pp. 62, illus. 1891.

Kerosene emulsion and pyrethrum. I. L., vol. 4, pp. 32, 33. 1891.

Government work and the Patent Office [entomological]. I. L., vol. 4, pp. 46, 47. 1891.

On the habits and life history of *Diabrotica 12-punctata*. I. L., vol. 4, pp. 104–108, illus. 1891.

A new herbarium pest. I. L., vol. 4, pp. 108–113, illus. 1891.

Further notes on *Panchlora*. I. L., vol. 4, pp. 119, 120, illus. 1891.

A viviparous cockroach. I. L., vol. 3, pp. 443, 444, illus. 1891.

Report of the Entomologist. Ag. Rpt. 1892, pp. 153–180, illus.

Introduction—The work of the season—International exchanges—Two dangerous importations—The introduction of Hessian fly parasites—Spread of the horn fly—The ox bot—The rose flies of the United States—The strawberry weevil—Experiments with the European white-grub fungus—New observations on the elm-leaf beetle—Work of the field agents—Apiculture—The pea and bean weevils—The sugar-beet webworm (*Loxostege sticticalis*)—Life history—The short borer or pin borer of the sugar cane (*Xyleborus perforans*)—Habits of the species—Suggested remedies—The technical name of the insect—The insectary of the Division.

The larger digger wasp. I. L., vol. 4, pp. 248–252, illus. 1892.

The ox bot in the United States. I. L., vol. 4, pp. 302–317, illus. 1892.

Some interrelations of plants and insects. I. L., vol. 4, pp. 358–378, illus. 1892.

Structural characteristics of *pronuba*—The acts of pollination and oviposition—Development and transformations of *pronuba*—The bogus yucca moth—Other species of *prodoxus*—Caprification of the fig—Generalizations—On fortuitous variations—Transmission of characters through heredity.

Rose sawflies in the United States. I. L., vol. 5, pp. 6–11, illus. 1892.

The bristly rose worm (*Cladius pectinicornis*)—The banded Emphytus or curled rose worm (*Emphytus cinctus*)—Summary of the habits of the three sawflies affecting roses in the United States—Remedies.

Riley, Charles V.—Continued.

New injurious insects of a year. I. L., vol. 5, pp. 16-19. 1892.

Further notes on the new herbarium pest. I. L., vol. 5, pp. 40, 41. 1892.

An Australian Sycamus established and described in California. I. L., vol. 5, pp. 127, 128. 1892.

Report on a small collection of insects made during the Death Valley Expedition. N. A. Fauna, No. 7, pp. 235-252. 1893.

Report of the Entomologist. Ag. Rpt. 1893, pp. 199-226. Illus.

Introductory—The work of the season—Destructive locusts—The Western or Great Plains cricket—The orange mealy wing—The periodical cicada—The hop plant-house in the Northwest—Damage to fruit trees by the red-legged flea beetle—Further bollworm investigation—Japanese insects—Another scale insect newly imported into California—Another enemy of the black scale—Introduction of Hessian-fly parasites—Work of field agents—The San Jose or pernicious scale—Previous investigations—Sudden appearance of the species in the East—Natural enemies at Charlottesville—How the species is distributed locally—Stamping out the species at Charlottesville—Character of the species and its general appearance—The West Indies peach diaspis—History of the species in the Atlantic States—Occurrence in the West Indies—A dangerous species—Life history.

The genus *Dendrotettix*. I. L., vol. 5, pp. 254-256. 1893.

Further notes on yucca insects and yucca pollination. I. L., vol. 5, pp. 300-310, illus. 1893.

Parasitic and predacious insects in applied entomology. I. L., vol. 6, pp. 130-141. 1893.

The insects occurring in the foreign exhibits of the World's Columbian Exhibit. I. L., vol. 6, pp. 213-227. 1894.

Bees. I. L., vol. 6, pp. 350-360, illus. 1894.

The senses of insects. I. L., vol. 7, pp. 33-41, illus. 1894.

Riley, Charles V., and C. L. Marlatt.

The clover mite (*Bryobia pratensis*). I. L., vol. 3, pp. 45-52, illus. 1890.

Wheat and grass sawflies. I. L., vol. 4, pp. 168-179, illus. 1891.

Ringwalt, Samuel.

The horse—from practical experience in the army. Ag. Rpt. 1866, pp. 321-334, illus.

Origin and usefulness—The horse in war—The horses of the United States—Action of European governments—Horse breeding—Judging horses—Selecting horses for the army from Government corrals—On the relative powers of endurance for the different kinds of service of the several classes of animals during the war—Faults and vices—Treatment—Food—Diseases—The fall of the horse.

Oology of some of the land birds of New England, as a means of identifying injurious or beneficial species. Ag. Rpt. 1864, pp. 386–430.

Falconidæ—Duck hawk—Great-footed hawk (*Falco anatum*)—Pigeon hawk—Bullet hawk (*Hypotriorchis columbarius*)—Sparrow hawk (*Tinnunculus sparrius*)—Cooper's hawk (*Accipiter cooperii*)—Sharp-shinned hawk (*A. fuscus*)—Red-tailed hawk, winter falcon, hen hawk (*Buteo borealis*)—Red-shouldered hawk (*B. lineatus*)—Broad-winged hawk (*B. pennsylvanicus*)—Marsh hawk—Harrier, mouse hawk (*Circus hudsonius*)—Golden eagle (*Aquila canadensis*)—White-headed eagle—Bald eagle (*Haliaetus leucocephalus*)—Fish hawk—American osprey (*Pandion carolinensis*)—Strigidæ—Barn owl (*Strix pratincola*)—Great horned owl—Cat owl (*Bubo virginius*)—Mottled owl—Screech owl (*Scops asio*)—Long eared owl (*Otus wilsonianus*)—Short-eared owl (*Brachyotus cassinii*)—Barred owl (*Syrnium nebulosum*)—Hawk owl—Day owl (*Surnia ulula*)—Yellow-billed cuckoo (*Coccygus americanus*)—Black-billed cuckoo (*Coccygus erythrophthalmus*)—Hairy woodpecker (*Picus villosus*)—Downy woodpecker—Sapsucker (*P. pubescens*)—Black-backed three-toed woodpecker (*Picoides arcticus*)—Yellow-bellied woodpecker (*Sphyrapicus varius*)—Pileated woodpecker—Black log-cock (*Hylatomus pileatus*)—Red-headed woodpecker (*Melanerpes erythrocephalus*)—Golden-winged woodpecker—Yellow hammer, flicker (*Colaptes auratus*)—Ruby-throated humming bird (*Trochilus colubris*)—Chimney swallow (*Chaetura pelagica*)—Whip-poor-will (*Antrostomus vociferus*)—Night hawk (*Chordeiles popetue*)—Belted kingfisher (*Ceryle alcyon*)—Kingbird—Bee martin (*Tyrannus carolinensis*)—Great crested flycatcher (*Myiarchus cri-*

Samuels, E. A.—Continued.

nitus)—Pewee, Phebe bird (*Sayornis fuscus*)—Wood pewee (*Cantopus virens*)—Least flycatcher (*Empidon x minimus*)—Wood thrush—Song thrush (*Turdus mustelinus*)—Hermit thrush (*T. pallasii*)—Wilson's thrush—Tawny thrush (*T. fuscescens*)—Olive-backed thrush—Swainson's thrush (*T. swainsonii*)—Robin (*T. migratorius*)—Brown thrush—Brown thrasher, mavis (*Harporhynchus-rufus*)—Cat bird (*Minus carolinensis*)—Blue bird (*Sialia sialis*)—Black and white creeper (*Mniotilta varia*)—Blue yellow-backed warbler (*Parula americana*)—Maryland yellow throat (*Geothlypis trichas*)—Yellow-breasted chat (*Icteria viridis*)—Nashville warbler (*Helminthophaga ruficapilla*)—Golden-crowned thrush—Oven bird (*Seiurus aurocapillus*)—Water thrush (*S. noveboracensis*)—Black-throated green warbler (*Dendroica virens*)—Yellow-rump warbler—Myrtle bird (*D. coronata*)—Pine-creeping warbler (*D. pinus*)—Chestnut-sided warbler (*D. pennsylvanica*)—Yellow warbler—Summer yellow bird (*D. aestiva*)—Black-poll warbler (*D. striata*)—Prairie warbler (*D. discolor*)—Red start (*Setophaga ruticilla*)—Scarlet tanager (*Pyranga rubra*)—Barn swallow (*Hirundo horreorum*)—Cliff swallow—Eaves swallow (*H. lunifrons*)—Stump swallow—White-bellied swallow (*H. bicolor*)—Bank swallow (*Cotyle riparia*)—Martin—Purple martin (*Progne purpurea*)—Cedar bird—Cherry bird (*Ampelis cedrorum*)—Shrike—Butcher bird (*Collyrio borealis*)—Red-eyed vireo—Red-eyed flycatcher (*Vireo olivaceus*)—Warbling vireo—Warbling flycatcher (*V. gilvus*)—White-eyed vireo—White-eyed flycatcher (*V. noveboracensis*)—Solitary vireo—Blue-headed flycatcher (*V. solitarius*)—Yellow-throated vireo, or flycatcher (*V. flavifrons*)—Long-billed marsh wren (*Cistothorus palustris*)—Short-billed marsh wren (*Cistothorus stellaris*)—House wren (*Troglodytes aedon*)—American creeper—Brown creeper (*Certhia americana*)—Red-bellied nuthatch (*Sitta canadensis*)—Black-cap titmouse—Chickadee (*Parus arcticapillus*)—Purple finch (*Carpodacus purpureus*)—Yellow bird—Thistle bird—Goldfinch (*Chrysomitris tristis*)—Savannah sparrow (*Passerculus savanna*)—Grass finch—Bay-winged bunting (*Poocetes gramineus*)—Yellow-winged sparrow (*Coturniculus passerinus*)—Sharp-tailed finch (*Ammodromus caudatus*)—Seaside finch (*A. maritimus*)—White-throated sparrow—Peabody bird—Wheat bird (*Zonotrichia albicollis*)—Snow bird (*Junco hyemalis*)—Field sparrow (*Spizella pusilla*)—Chipping sparrow—Hair bird (*Spizella socialis*)—Song sparrow (*Melospiza melodia*)—Swamp sparrow (*M. palustris*)—Rose-breasted grosbeak (*Guiraca ludoviciana*)—Indigo bird (*Cyanospiza cyanea*)—Chewink—Towhee bunting—Ground robin (*Pipilo erythrophthalmus*)—Skunk blackbird—Bob-o-link, reed bird, rice bird (*Dolichonyx oryzivorus*)—Cow bird—Cow blackbird—Cow bunting (*Molothrus pecoris*)—Red-winged blackbird—Swamp blackbird (*Agelaius phoeniceus*)—Meadow lark—Marsh quail (*Sturnella magna*)—Orchard oriole (*Icterus spurius*)—Baltimore oriole—Golden robin—Hang bird (*I. baltimore*)—Rusty blackbird (*Scolecophagus ferrugineus*)—Crow blackbird—Purple grackle (*Quiscalus versicolor*)—Common crow (*Corvus americanus*)—Blue jay (*Cyanura cristata*)—Canada jay—Moose bird (*Perisoreus canadensis*).

Salmon, D. E.

Investigation of swine plague. Ag. Rpt. 1878, pp. 432–443, illus.

The losses of swine—The contagious hog fever—Means of prevention—Extent of disease, number, and percentage of deaths—Are these losses the result of a single disease?—Symptoms—Post-mortem appearances—Nature of the disease—Hygienic and medical treatment as preventives—Sanitary regulations.

Investigation of swine plague. Spl. Rpt. No. 12, pp. 123–134. 1879.

Investigation of Southern cattle fever. Spl. Rpt. No. 22, pp. 98–141. 1880.

Investigations of swine plague and fowl cholera. Ag. Rpt. 1880, pp. 387–454, illus.

Effect of solution of chloride of zinc on the virus—Effect of putrefaction on virus—Effect of drying the virus—Inoculations with cultivated virus—Microscopic investigations in regard to the nature of the virus—Cultivation of the virus—Investigations of fowl cholera—Experimental study of the disease—Is it communicable?—The liquids or organs containing the virus—Effect of taking the virus with the food—Are the germs transported

Salmon, D. E.—Continued.

by the atmosphere?—Is the disease contracted from infected habitations?—Effect of putrefaction on virus, of drying the virus, and of diluting virus—The blood in the body retains its virulence thirty-six hours after the death of the bird—The alcoholic extract of blood not virulent—Effect of salicylic acid on virus; of benzoic acid on virus; of sulphuric acid on virus; of alcohol on virus; of boracic acid and sulphate of potassium on virus; of boracic acid on virus; of carbolic acid on virus; of carbolated camphor on virus; of iodine on virus; of heat on virus—One attack of the disease protects against the effect of subsequent inoculations—A certain number of fowls resist inoculation—Devitalized virus as a preventive—Attempts to obtain a mitigated virus—Preservation of a cultivated virus—Susceptibility increased by cold weather—Résumé of results attained by these experiments—Symptoms—Period of incubation and duration of the disease—Post-mortem appearances—Microscopical investigations—Influence of recent investigations on the theories of contagia—Theories of contagion and what is required to establish them—The contagium of anthrax; of septicæmia; of fowl cholera; and of swine plague—Influence of recent investigations on our means of preventing contagious diseases.

Investigations of swine plague and fowl cholera (second report). Spl. Rpt. No. 34, pp. 13–80, illus. 1881.

Investigation of swine plague, fowl cholera, and Southern cattle fever. Ag. Rpt. 1881, pp. 258–316, illus.

Objects and methods of investigation—Cause of contagious fevers—Pathogenic bacteria—Inoculation experiments—Examination of liquids for bacteria and of tissues for bacteria—Keeping distilled water free from bacteria—Preparing aniline staining fluid—The cultivation of bacteria—Manner of using the cultivation apparatus—Ultimate objects of such investigations—Investigations of swine plague—Investigations of fowl cholera—Virulence of the excrement—The efficiency of sulphuric acid as a disinfectant—Virus not indefinitely preserved in earth—The germs may retain their virulence a considerable time under certain conditions—The sixth successive cultivation of virus in tubes retains its activity unimpaired—Pathogenic action of the bacteria—The bacterium probably exists in but one form—Effects of a mixture of salicylic acid and borax on the virus; of benzoic acid and borax on the virus; of carbolic acid on the virus—The medical treatment of fowl cholera—Attenuation of the fowl-cholera virus—Susceptibility and insusceptibility—Susceptible birds which contract the local lesion from the diluted virus become insusceptible—Insusceptible birds inoculated with sufficiently large quantities of virus succumb to the disease—Theories of insusceptibility—The narcotic of fowl-cholera virus—Influence of the narcotic on the activity of the virus—The amount of the chemical products required to produce insusceptibility—Investigations of Southern cattle fever—Progress of the year in the prevention of contagious diseases—The Anthois method of vaccination and medical treatment.

Prevention of fowl cholera. Spl. Rpt. No. 34, pp. 314–317. 1881.

The dissemination of Texas fever and how to control it. Spl. Rpt. No. 50, pp. 10–14. 1882.

Prevention of contagious diseases of animals in America. Unnum. rpt., pp. 32–37. 1883.

Report of the Veterinarian. Ag. Rpt. 1883, pp. 17–67, illus.

Investigation of Texas cattle fever and fowl cholera. Unnum. rpt., pp. 13–102, illus., in “Contagious diseases.” 1883.

Investigations of Texas cattle fever and fowl cholera. Ag. Rpt. 1883, pp. 18–67, illus.

Report of the Chief of the Bureau of Animal Industry. Ag. Rpt. 1884, pp. 181–284, illus.

Investigation of pleuro-pneumonia—Enzootics of ergotism—Geographical distribution of Southern cattle fever—Investigation of swine plague—The gape disease of fowls, and the parasite by which it is caused, by Theobald Smith.

Salmon, D. E.—Continued.

National legislation for the contagious diseases of animals. Unnum. rpt., pp. 13-29. 1885.

Trichiniasis. 1st Rpt. B. A. I., pp. 475-492. 1885.

Includes remarks on salt used in packing.

Report of the Chief of the Bureau of Animal Industry [to Congress]. 1st Rpt. B. A. I., pp. 7-232, illus. 1885.

On contagious pleuro-pneumonia—On enzootics of ergotism—On Southern cattle fever—On swine plague.

Report of the Chief of the Bureau of Animal Industry. Ag. Rpt. 1885, pp. 431-568, illus.

Action taken in regard to pleuro-pneumonia—Summary in regard to pleuro-pneumonia—Investigations in swine plague—Geographical distribution of Southern cattle fever—The gape disease of fowls—Verminous bronchitis in calves and lambs and its treatment by tracheal injections—United States neat cattle quarantine.

Second annual report of the Bureau of Animal Industry. 2d B. A. I. Rpt., pp. 9-292, illus. 1886.

On contagious pleuro pneumonia—On swine plague—On Southern cattle fever—On gapes in fowls—On verminous bronchitis (lung worms)—On neat cattle quarantine.

Report on the beef supply of the United States and the export trade in animals and animal products. Unnum. rpt., pp. 15. 1890.

Report of the Chief of the Bureau of Animal Industry for 1893. 10th and 11th Rpts. B. A. I., pp. 7-24. 1896.

Report of the Chief of the Bureau of Animal Industry for 1894. 10th and 11th Rpts. B. A. I., pp. 25-39. 1896.

Black quarter. 10th and 11th Rpts. B. A. I., pp. 84-87. 1896.

Actinomycosis, or lumpy jaw. 10th and 11th Rpts. B. A. I., pp. 88-91. 1896.

Report of the Chief of the Bureau of Animal Industry. Ag. Rpt. 1886, pp. 539-686, illus.

Progress of pleuro-pneumonia and action taken in regard to it—Investigations of swine diseases—Preliminary investigations concerning infectious pleuro-pneumonia in swine (swine plague).

[Address before the National Cattle-growers' Convention held at Kansas City, Missouri, October 31 and November 1 and 2, 1887.] Unnum. rpt., pp. 7-11. 1887.

Tea culture as a probable American industry. Spl. Rpt. No. 18, pp. 21, illus. 1879.

[The Government tea gardens.] Ag. Rpt. 1881, pp. 28, 29.

Report of the Superintendent of Gardens and Grounds. Ag. Rpt. 1881, pp. 215-230.

Thrips on grapes—Tamarind tree (*Tamarindus indica*)—The cherimoyer (*Anona cherimolia*)—The sweet sop (*A. squamosa*)—*Bromelia sylvestris* and *B. karatas*—The Paraguay tea tree (*Ilex paraguayensis*)—The chocolate plant (*Theobroma cacao*)—Turmeric—The Sicilian sumac (*Rhus coriaria*)—The Japan varnish tree (*R. vernicifera*)—The lee-chee tree (*Nephelium litchi*)—The sago palms (*Sagrus rumphii* and *S. lavis*)—Aloes—The clover tree (*Caryophyllus aromaticus*)—The Chinese tallow tree (*Excacaria sebifera*)—The chocho, or chayote, root—The cork tree (*Quercus suber*)—The camphor tree (*Camphora officinalis*)—The cinnamon tree (*Cinnamomum zeylanicum*)—The nutmeg tree (*Myristica moschata*)—Allspice, or pimento—The bayberry tree—Arrowroot—The cassava plant—The pistachio nut—Chios turpentine—Vanilla—Orris root—Pepper.

[On grape mildew.] Unnum. rpt., pp. 194, 195, in "Proceedings." 1882.

Report of the Superintendent of Gardens and Grounds. Ag. Rpt. 1883, pp. 181-196.

Grapes—The potato rot—Situations for orchards—Glazing greenhouse roofs—Raspberry culture—Root-pruning trees—Keeping hedges—Making and keeping lawns—Management of orchards—On draining lands—Flower pots—Seed saving.

Observations on the soils and products of Florida. Spl. Rpt. No. 62, pp. 30. 1883.

Report of the Superintendent of Gardens and Grounds. Ag. Rpt. 1885, pp. 33-46.

Mildews and blights—The peach leaf blister—Pear tree blight and cracking of pears—The rot of the potato.

Report of the Superintendent of Gardens and Grounds. Ag. Rpt. 1886, pp. 687-703.

Notes on orange culture, etc.—The pineapple—The Japanese persimmon.

Saunders, William—Continued.

Report of Superintendent of Gardens and Grounds. Ag. Rpt. 1887, pp. 673-690.

Vanilla—Mahogany tree—Cochineal—Treatment of land—Apple trees—Coffee—Lotus plant—Le Conte pear—Lawn making—Brazil nut—Chicle gum—Opium poppy—Camphor tree—Bahia orange—Canary seed—Tree planting—Pear blight—Coffee—Mustard seed—Grape rot—Licorice—Pruning grapes—Tonka bean—Zante currant—Lime wash for trees—Rhubarb—Ginseng—Horse-chestnut tree—India grains—Seedling oranges—Peen-to peach—Indigo—Navel oranges—Nettle fiber—Eucalyptus tree—Peruvian tea—Block pepper—Ramie—Wahwah tree—Osage orange.

Report of the Chief of the Division of Gardens and Grounds. Ag. Rpt. 1889, pp. 111-134.

Grapes—Mildew—Well-ripened wood—Watering plants in pots—Citron, (*Citrus medica*)—Horticulture in the Department—Objects and aims of the experiment garden—Grapes—Pear trees—Peaches—Japan persimmons—Cinchonas—Chinese tea plant—Coffee—Oranges, lemons, and other citrus fruits—Apples—Olives—Eucalyptus—Figs—Testing the merits of species and varieties of plants—Laying out the grounds and planting the arboretum—The conservatory—Pineapples—Building glass houses—Hedges—Miscellaneous plants propagated and distributed.

Report of the Chief of the Division of Gardens and Grounds. Ag. Rpt. 1890, pp. 557-594.

Descriptive catalogue of plants.

Report of the Superintendent of Gardens and Grounds. Ag. Rpt. 1891, pp. 463-484, illus.

Report of the Superintendent of Gardens and Grounds. Ag. Rpt. 1891, pp. 463-484, illus.

Gardens and grounds—Notes on horticultural and kindred subjects—Cuttings—Cinchonas—Coffee—Coca, cocoa, or coco—Water for plants in pots—Osage orange—Protecting plants during winter—Changing seed—Planting trees—The strawberry—Draining "hard-pan" soils—Altitudes for fruit trees and grapevines—Packing the soil around roots and seeds—Brussels sprouts—Ripening of the fruit—*Trapa natans*—Peach blister—Soil for plants in pots—Summer pruning of grapes—Vines on walls—Trees in cities and on streets—Advantages and disadvantages of trees in cities—Selection of trees—Preparation of the soil—Preparation of the trees—Distance apart—Time to plant—Planting—Box guards—Pruning—Insects—Gas leakage—Concluding remarks.

Catalogue of economic plants in the collection of the United States Department of Agriculture. Unnum. rpt., pp. 42. 1891.

Papers on horticultural and kindred subjects. Unnum. rpt., pp. 124. 1891.

Report of the Superintendent of Gardens and Grounds. Ag. Rpt. 1892, pp. 377-402.

Notes on horticultural subjects—Pineapple culture—Olives—Tea—Pruning—Pear-tree blight—Grafting—Its purposes—Plants for protecting a sloping bank—Cultivation of figs—Ornamental trees for lawns—Parlor plants and their management—Hybridizing and crossing—Farmer's gardens—Transplanting trees during winter—The cassava plant—Winter coverings for plant frames—Manuring orchards—The Jerusalem artichoke—The medlar tree—The artichoke—Plunging pot for plants—Action of frost—Uses of the sweet chestnut—Summer flowering bulbs—Old trees—Thinning fruit—Sea kale—The Chinese potato—The pomegranate—Rose beds—Pears cracking—The sunflower (*Helianthus annuus*)—Sanitary effects of burning sulphur—Saffron—The carrot—Bedding plants—The myrtle—Evergreens—Keeping cut flowers—Flower garden and lawns.

Saunders, William—Continued.

Report of the Superintendent of Gardens and Grounds. Ag. Rpt. 1893, pp. 365-388.

Work of the year—Notes on miscellaneous plants—Willows—Acacias—Aloes—Cashew nut—Box tree—Cæsalpinias—Pigeon pea—Papaw tree—The clove tree—Carob beans—Otaheite gooseberry—Quinoa—Chick-pea—Clusias—Cola nut—Hazelnuts—Mangosteen—Soy bean—Guaiacum—Logwood—Rubber trees—Dout palm—Granadillas—Pistachio nuts—Rain tree—Patchouli—Rhubarb—Camphor—Interrogatories and replies—Coffee—Niauli—Cardamom—Orris root—Canaigre root—Soja bean—Mexican jumping beans—India-rubber tree—Grape seeds—Pear-tree blight—Fig cuttings—Olives—Calla lily—Nutmegs—Orange culture.

Cranberry culture. F. B. No. 13, pp. 16. 1894.

Report of the Chief of the Division of Gardens and Grounds. Ag. Rpt. 1894, pp. 207, 208.

Report of the Chief of the Division of Gardens and Grounds. Ag. Rpt. 1895, pp. 189, 190.

Report of the Superintendent of Experimental Gardens and Grounds. Ag. Rpt. 1897, pp. 159, 160.

Scarborough, Miles.

On the culture of cotton. Ag. Rpt. 1845, pp. 755, 756.

Schade, Louis.

Character, cultivation, and use of the lupine. Ag. Rpt. 1861, pp. 370-373.

Soil—Cultivation—Green manure—The fertilizing power of the lupine—The seed of the yellow lupine.

Schaeffer, George C.

Investigation of the potato disease. Ag. Rpt. 1853, pp. 175-177.

Growth and manufacture of cotton. Ag. Rpt. 1853, pp. 192-195.

Investigation of the cotton fiber. Ag. Rpt. 1854, pp. 181-183.

Microscopic examination of the hair of Asiatic goats. Ag. Rpt. 1855, pp. 57-59, illus.

The China grass: Its history and uses. Ag. Rpt. 1855, pp. 244-247.

Scheffer, Theodore H.

Notes and observations on the twig girdler (*Oncideres cingulata*). I. L., vol. 7, pp. 345-347. 1895.

Schenck, J. P.

[Report on farm crops, etc., in Maryland.] Ag. Rpt. 1850, pp. 413, 414.

Schickler, C.

Pomology in Wurtemberg. Mo. Rpt. 1870, pp. 153, 154.

Schott, Arthur.

The Niin of Yucatan. Ag. Rpt. 1868, pp. 268-271.

Schott, Charles A.

Magnetic survey of North America. W. B. Bul. No. 2, pt. 2, pp. 460-465. 1895.

Schöyen, W. M.

Notes on insects of Norway and Sweden. Ent. Bul. No. 9, n. s., pp. 79, 80. 1897.

Schreiber, Paul.

Meteorological observations considered with special reference to influence on vegetation. W. B. Bul. No. 2, pt. 2, pp. 395-404. 1895.

Schroeder, E. C.

"Bottom disease" among horses of South Dakota. 8th and 9th Rpts. B. A. I., pp. 371-374. 1893.

Prevalence of tuberculosis among cattle in New York. 10th and 11th Rpts. B. A. I., pp. 66-77. 1896.

Schroeder, E. C., and F. L. Kilborne.

Clinical and pathological notes on a herd of sixty cattle tested with tuberculin (Soldiers' Home herd). B. A. I. Bul. No. 7, pp. 7-87. 1894.

Schroeder, E. C., and E. A. de Schweinitz.

Further experiments with an attenuated tuberculosis bacillus. B. A. I. Bul. No. 13, pp. 11-14. 1896.

Schroeder, E. C., and Theobald Smith.

Some experimental observations on the presence of tubercle bacilli in milk of tuberculous cows when the udder is not visibly diseased. B. A. I. Bul. No. 3, pp. 60-66. 1893.

Schroeder, E. C., Theobald Smith, and F. L. Kilborne.

Additional investigations in Texas cattle fever. B. A. I. Bul. No. 3, pp. 67-72. 1893.

Schuster, Arthur.

The present condition of mathematical analysis as applied to terrestrial magnetism. W. B. Bul. No. 2, pt. 2, pp. 550-569, illus. 1895.

Schuyler, James D.

The construction of the Sweetwater dam. S. Rpt. No. 928, pt. 3, pp. 370-376, illus. 1890.

Schwarz, E. A.

Notes on *Eumæus atala*. I. L., vol. 1, pp. 37-40, illus. 1888.

Phytophagic dung beetle. I. L., vol. 3, pp. 484, 485. 1891.

The San Jose scale at Charlottesville, Virginia. I. L., vol. 6, pp. 247-252. 1894.

Note on *Hylesinus sericeus*. I. L., vol. 7, pp. 254-256, illus. 1894.

The cotton worm question in 1894. I. L., vol. 7, pp. 315-320. 1895.

Are tumblebugs beneficial? I. L., vol. 7, pp. 358, 359. 1895.

The Hippelates plague in Florida. I. L., vol. 7; pp. 374-379, illus. 1895.

An imported library pest. I. L., vol. 7, pp. 396-398, illus. 1895.

A new furniture pest. I. L., vol. 7, pp. 419, 420. 1895.

The home of the chinch bug. I. L., vol. 7, pp. 420-422. 1895.

Report on cotton insects. Cot. Insects, pp. 347-349. 1897.

Remarks on the hibernation of Aletia. Cot. Insects, pp. 349, 350. 1879.

The periodical cicada in 1897. Ent. Circ. No. 22, 2d s., pp. 4. 1897.

Schwarz, E. A., and Walter B. Barrows.

The common crow of the United States. O. and M. Bul. No. 6, pp. 98. 1895.

Schweinitz, E. A. de.

Report on the chemical analyses of osage orange. Ag. Rpt. 1889, pp. 473-476.

Investigation of E. A. de Schweinitz, Ph. D. Ag. Rpt. 1890, pp. 122-132.

Hog cholera—Experiments upon hogs—Swine plague—Miscellaneous.

Results of chemical investigations for the prevention of disease. 6th and 7th Rpts. B. A. I., pp. 110-128. 1891.

Hog cholera—Experiments upon hogs—Swine plague—Experiments upon hogs for swine plague—Is immunity from hog cholera hereditary?—Glanders—Miscellaneous.

Investigation of the effects of bacterial products in the prevention of diseases. Ag. Rpt. 1891, pp. 138-142.

Swine-plague experiments upon hogs—Hog cholera—Glanders.

Investigation conducted by the Biochemic Laboratory during 1892. Ag. Rpt. 1892, pp. 119-122.

Mallein—Tuberculin—Dehorning compounds.

Work conducted in the Biochemic Laboratory. Ag. Rpt. 1893, pp. 161-167.

Tuberculin tests—Glanders.

Investigation of the effects of bacterial products in the prevention of diseases. 8th and 9th Rpts. B. A. I., pp. 66-70. 1893.

Investigations conducted by the Biochemic Laboratory during 1892. 8th and 9th Rpts. B. A. I., pp. 105-108. 1893.

Mallein—Tuberculin—Dehorning compounds.

The pasteurization and sterilization of milk. Y. B. 1894. pp. 331-356, illus.

Preservation with chemicals—Pasteurization of milk for children—Preparation of milk for infants and invalids—Pasteurization of milk in bulk, in small flasks or cans, in America—Effect of sterilization on digestibility—Different forms of apparatus—Sterilization of milk.

Tuberculin and its use. B. A. I. Bul. No. 7, pp. 159-178. 1894.

Butter substitutes. Y. B. 1895, pp. 445-452.

Manufacture and sale of oleomargarine—Material used for manufacture—Hygienic effects of oleomargarine—Possibility of transmitting infectious diseases—Fraudulent sale of oleomargarine.

Some modern disinfectants. Y. B. 1896, pp. 255-262, illus.

The nature of disinfection—The merits of some disinfectants—Summary.

Chemical examination of cornstalks presumably the cause of cornstalk disease in cattle. B. A. I. Bul. No. 10, pp. 88-90. 1896.

The effect of tuberculin injections upon the milk of healthy and diseased cows. B. A. I. Bul. No. 13, pp. 15-27, illus. 1896.

Schweinitz, E. A. de, and Marion Dorset.

The growth of tuberculosis bacillus upon acid media. B. A. I. Bul. No. 13, pp. 7-10, illus. 1896.

Schweinitz, E. A. de, and E. C. Schroeder.

Further experiments with attenuated tuberculosis bacillus. B. A. I. Bul. No. 13, pp. 11-14. 1896.

Schweitzer, P., and C. P. Fox.

Smith, Eugene A.

The cotton belt. 4th Rpt. Ent. Com., pp. 59-80, maps. 1885.

General features of the cotton States—Alluvial region—Lower prairie region—Longleaf pine region—Oak uplands region—Upper prairie region—Red and brown loam region—Sandy and siliceous lands of the older formations—Gneissic region.

Smith, Gideon B.

Silk culture in the United States. Ag. Rpt. 1845, pp. 859-861.

Smith, Erwin F.

Synopsis of replies to a circular relative to grape mildew and grape rot in the United States. Bot. Bul. No. 2, pp. 45-53. 1886.

Peach yellows: A preliminary report. Bot. Bul. No. 9, pp. 254, illus. 1889.

Spotting of peaches. Jour. Mycol., vol. 5, pp. 32, 33. 1889.

Peach rot and peach blight (*Monilia fructigena*). Jour. Mycol., vol. 5, pp. 123-134. 1889.

Smith, Erwin F.—Continued.

Prevalence of ergot in 1889. Jour. Mycol., vol. 5, pp. 203–204. 1889.

What to do for peach yellows. Jour. Mycol., vol. 6, pp. 15, 16. 1890.

Field notes. Jour. Mycol., vol. 6, pp. 107–110. 1891.

Peach leaf curl—Plum taphrina—Plum blight—Apple blight—Pear-leaf blight—Black rot—Vine blight—Brown rot of the peach—Peach yellows—Peach rosette.

The peach rosette. Jour. Mycol., vol. 6, pp. 143–148, illus. 1891.

Peach blight (*Monilia fructigena*). Jour. Mycol., vol. 7, pp. 36–39, illus. 1891.

Additional evidence on the communicability of peach yellows and peach rosette. Veg. Path. Bul. No. 1, pp. 65, illus. 1891.

Field notes. Jour. Mycol., vol. 7, pp. 88–95. 1892.

Peach curl—Peach mildew—Black spot of peaches—Frosty mildew—Peach rust—Peach rot—Peach yellows—Clubbed branches—Stem and root tumors—Peach rosette—Plum blight—Pear diseases—Sycamore blight.

Additional notes on peach rosette. Jour. Mycol., vol. 7, pp. 226–232. 1893.

Spread of the disease—Field experiments in Georgia.

Experiments with fertilizers for the prevention and cure of peach yellows, 1889–1892. Veg. Path. Bul. No. 4, pp. 197, illus. 1893.

Field notes, 1892. Jour. Mycol., vol. 7, pp. 373–377, illus. 1894.

A new melon disease—Grape powdery mildew—Apple scab—Pear blight—Gooseberry leaf blight—Black spot of the peach—*Cercospora* (?) on peaches—Peach mildew—Peach curl—Wilting of peaches on the tree—Stem and root tumors—Root rot of the peach.

Peach yellows and peach rosette. F. B. No. 17, pp. 20, illus. 1894.

Peach growing for market. F. B. No. 33, pp. 24, illus. 1895.

Legal enactments for the restriction of plant diseases. Veg. Phys. and Path. Bul. No. 11, pp. 45. 1896.

The black rot of the cabbage. F. B. No. 68, pp. 22. 1898.

Smith, E. Goodrich.

On the culture of the *Madia sativa*, a new oleaginous plant. Ag. Rpt., 1845, pp. 967–969. [Translation.]

Maize in Mexico. Ag. Rpt. 1847, pp. 411–414. [Translation.]

On the culture of potatoes. Ag. Rpt., 1847, pp. 415–420.

(Article by Prof. Hlubek, of Gratz, and translated from the German)—Different kinds of manure on the growth of potatoes and the quantity of starch meal contained in them—Influence of dividing potatoes on the product—Influence of the wider or closer planting on the product of potatoes—Influence of the size of the potato tubers used as seed on the product.

Flax culture. Ag. Rpt. 1847, pp. 425–427.

(Translation from an article by Ludwig Carl Edler von Nadherny)—Soil and climate—Manuring—Previous crop—Preparation of the soil—Choice of seed—Strength of the seeding—Time of sowing—Culture—Harvesting and pulling—Assorting.

Breeding of cattle. Ag. Rpt. 1847, pp. 475–493.

(Translation from an article by T. V. Lanner)—On the feeding of horned cattle and the conditions of the most profitable use of the fodder substances—On the value of fodder substances—Determination of the per-

Smith, E. Goodrich—Continued.

centage of fat—Determination of the flesh weight from the live weight—Mode of determining the flesh weight by measuring the animal—Table in which is given the pure flesh weight of a herd of cattle measured according to circumference and length.

On raising calves. Ag. Rpt. 1847, pp. 493, 494. [Translation.]

On feeding sheep. Ag. Rpt. 1847, pp. 494–502.

(Article by G. Ockel and translated from the German)—How the conservation fodder must be established as to the bodily weight, and in what proportion the fodder, aiding the production, i. e., beyond mere conservation, operated for making flesh, i. e., bodily increase and wool, accordingly as more or less of it was given—Whether large or small animals, with food in equal proportion to their bodily weight, will also be sustained in their bodily state, increase, or fall off in equal proportion—Whether a similar proportion is established also in young animals which are yet fully growing.

On the proportions of nutriment of the means of living. Ag. Rpt. 1874, pp. 540, 541. [Translation.]

Summary of opinions on the potato disease. Ag. Rpt. 1848, pp. 563–569. [Translation.]

Culture of the artichoke. Ag. Rpt. 1848, pp. 578–582.

(Translation of an article in the French by Girardin and Dubreuil)—Culture of the artichoke as a green fodder—Climate and soil—Its place in the rotation—Preparation of the soil—Planting—Care of them while growing—Gathering—Preservation of the tubers—Product raised.

On the culture of madder. Ag. Rpt. 1848, pp. 583–603.

(Translation of an article in the Journal d'Agriculture Pratique et de Jardinage)—Growth of madder—Component parts of manure for madder—Soils best fitted for madder—General culture—Culture by seed—Extraction of roots at eighteen months—Transplanting of madder—Account of the culture of a hectare of madder.

On the culture of rhubarb (*Rheum emodi*) in Steiermark. Ag. Rpt. 1848, p. 604.

(Translation of an article by Dr. Hlubek)—Natural historical distinctions—Cultivation—State of planting in Belden.

Irrigation. Ag. Rpt. 1860, pp. 166–224.

Smith, E. J.

Culture of madder in Smyrna. Mo. Rpt. 1870, pp. 284, 285.

Smith, Halsted.

[Address on road improvement.] Road Bul. No. 10, pp. 39–41. 1894.

Smith, Henry M.

Report on yaupon (*Ilex cassine*). Mo. Rpt. 1872, pp. 20–22.

Smith, Herman W.

Recent publications [on meteorology]. Mo. W. R., vol. 25, pp. 134, 135, 199, 200, 245, 294, 348, 393, 483, 538. 1897.

Smith, Jared G.

Forage conditions of the prairie region. Y. B. 1895, pp. 309–324, illus.

Area and general considerations—The arid prairies—Native forage plants—Prairie hay—Tame grasses and clovers—Soiling crops—Improvement of the ranges—Grasses and cattle.

Alfalfa, or lucern. F. B. No. 31, pp. 23, illus. 1895.

A note on experimental grass gardens. Agros. Circ. No. 1, pp. 4. 1895.

Smith, Jared G.—Continued.

Cowpeas (*Vigna catjang*). Y. B. 1896, pp. 287–296.

Origin and general considerations—Cowpeas and soil renovation—Cowpeas for forage—Methods of cultivation and harvesting—Cowpeas for swine and cattle—Cowpeas for ensilage—Harvesting the seed—The feeding value of cowpeas—Fertilizers.

Fodder and forage plants, exclusive of the grasses. Agros. Bul. No. 2, pp. 58, illus. 1896.

Saltbushes. Agros. Circ. No. 3, pp. 4, illus. 1896.

Meadows and pastures: Formation and cultivation in the Middle Eastern States. F. B. No. 66, pp. 24, illus. 1897.

Smith, Jared G., and F. Lamson-Scribner.

Some Mexican grasses collected by E. W. Nelson in Mexico, 1894–95. Agros. Bul. No. 4, pp. 11–16, illus. 1897.

Native and introduced species of the genera *Hordeum* and *Agropyron*. Agros. Bul. No. 4, pp. 23–36. 1897.

Smith, John B.

Report upon insects affecting the hop and the cranberry. Ag. Rpt. 1884, pp. 393–398.

Report upon cranberry and hop insects. Ent. Bul. No. 4, pp. 9–50, illus. 1884.

The vine worm or fire worm (*Anchylopera vacciniana*)—List of remedies—Recommendations—*Teras oxycoccana*—The cranberry spanworm (*Cymatophora pampinaria*)—The cranberry fruit worm—The broad-winged leaf hopper (*Amphiscepa bivittata*)—The cranberry tip worm—Locusts and crickets—The chain-spotted geometer (*Zerene catenaria*)—The red-striped cranberry worm—The hop grub (larva of *Hydræcia immanis*)—The hop snout moth (*Hypena humuli*)—The common butterfly (*Vanessa comma*)—The white-marked tussock moth (*Orgyia leucostigma*)—The fall webworm (*Spilosoma cunea*)—The hickory tussock moth (*Halesidota carya*)—The hop-plant louse (*Aphis* [*Phorodon*] *humuli*)—The hop-vine leaf hopper (*Typhlocyba* sp.).

New species of *Oncocnemis*. I. L., vol. 1, pp. 18–20. 1888.

Notes on *Lachnosterna*. I. L., vol. 1, pp. 180–185, illus. 1888.

Glæosporium nervisequum. Jour. Mycol., vol. 5, pp. 51, 52. 1889.

A new hollyhock disease. Jour. Mycol., vol. 6, pp. 45-50, illus. 1890.

Anthrachnose of cotton. Jour. Mycol., vol. 6, pp. 100-105, illus. 1891.

Additional observations on anthrachnose of the hollyhock. Jour. Mycol., vol. 6, pp. 115, 116. 1891.

Ripe rot of grapes and apples. Jour. Mycol., vol. 6, pp. 164-173, illus. 1891.

Southworth, Effie A., and B. T. Galloway.

Treatment of apple scab. Jour. Mycol., vol. 5, pp. 210-214. 1889.

Preliminary notes on a new and destructive oat disease. Jour. Mycol., vol. 6, pp. 72, 73. 1890.

Spalding, Thomas.

Culture of indigo. Ag. Rpt. 1845, pp. 976-978, illus.

Spear, Lewis H.

[Report on farm crops, etc., in Vermont.] Ag. Rpt. 1851, pp. 152-154.

Speechly, William.

A treatise on the culture of the vine. Ag. Rpt. 1866, pp. 103, 104, illus.

Spence, Philip B.

[Report on the commerce of Quebec, Canada.] For. Mkts. Bul. No. 4, pp. 42-44. 1895.

Animals, cereals, dairy products, meats, cotton, tobacco, fruits, liquors, seeds.

Spencer, Grove.

[Report on farm crops, etc., in Michigan.] Ag. Rpt. 1852, pp. 269-273.

Spencer, Guilford L.

Experiments in the manufacture of sugar at Magnolia Station, Lawrence, Louisiana. Ag. Rpt. 1886, pp. 328-342.

Report of experiments in the manufacture of sugar at Magnolia Station, Lawrence, Louisiana, season of 1885-86. Chem. Bul. No. 11, pp. 26, illus. 1886.

Report of experiments in the manufacture of sugar at Magnolia Station, Lawrence, Louisiana, season of 1886-87. (Third report.) Chem. Bul. No. 15, pp. 35. 1887.

Summary of data for four years at Magnolia. Chem. Bul. No. 18, pp. 46-58. 1888.

Spencer, Guilford L.—Continued.

Report of experiments in the manufacture of sugar by diffusion at Magnolia Station, Lawrence, Louisiana, season of 1888-89. Chem. Bul. No. 21, pp. 67. 1889.

Report on sugar. Chem. Bul. No. 38, pp. 149-154. 1893.

Report on sugar. Chem. Bul. No. 43, pp. 122-125. 1894.

Spengler, Joseph S.

[Report on farm crops, etc., in Virginia.] Ag. Rpt. 1848, pp. 478-483.

Sperk, Franz Otto.

The four great rivers of Siberia. W. B. Bul. No. 2, pt. 1, pp. 101-116. 1894.

Spivey, John.

[Report on farm crops, etc., in Iowa.] Ag. Rpt. 1852, pp. 286-288.

Sprague, G.

The meat question analyzed. Ag. Rpt. 1883, pp. 462-484.

Sprague, Thomas.

[Remarks on cotton in Lower California.] Ag. Rpt. 1856, p. 285.

Sprung, A.

On the construction of registering air thermometers to replace the ordinary alcohol and mercurial thermometers. W. B. Bul. No. 2, pt. 3, pp. 718-720, illus. 1896.

Stalker, M.

The "loco" plant and its effect on animals. 3d Rpt. B. A. I., pp. 271-276. 1887.

Standart, S. H.

The live-stock industry of Colorado and the Territories of the Northwest. 2d Rpt. B. A. I., pp. 327-334. 1886.

Stanton, Edgar.

Cultivation of the nettle in Germany. Ag. Rpt. 1878, pp. 560, 561.

Stanton, F. J.

Practical irrigation in Colorado. Ag. Rpt. 1871, pp. 254-287.

The levels—The dam, or weir—The sluice, hatch, or headgate—The head main ditch—Fall of the main ditch—Flume chute, or aqueduct—Puddling, or artificial bottoming—Measuring water—Reservoirs—Different modes of irrigation—Irrigation as a vehicle for fertilizers—How much and when to irrigate—The economy of irrigation—Ditches in Colorado—Alkali lands—Questions on irrigation—A great Western American canal—Irrigation systems of different countries—Irrigation in France—Irrigation in Spain—Irrigation in Italy—Irrigation in India—Irrigation in our Territories.

Starling, William.

Floods of the Mississippi River with reference to the inundation of the alluvial valley. W. B. Bul. No. 2, pt. 1, pp. 68-80. 1894.

Starr, Frederick, jr.

American forests: Their destruction and preservation. Ag. Rpt. 1865, pp. 210-234.

Evils of past destruction—Increase of destruction—Consumption by building railroads—Consumption for railroad fuel—General consumption of wood for fuel—Consumption by mechanical industry—Destruction by war—Improvident waste—Destruction for liquidation of farm debts—Reproduction prevented—Preventive measures proposed—National scientific experiments needed—Beginnings already in operation—Experiments should be protracted, thorough, and various—Warnings from history—What can be effected by such experiments—Individual efforts on too small a scale—Wood pays more than one-half of the entire internal revenue of the United States.

Stearns, Robert E. C.

Report on the land and fresh-water shells collected in California and Nevada by the Death Valley Expedition, including a few additional species obtained by Dr. C. Hart Merriam and assistants in parts of the Southwestern United States. N. A. Fauna No. 7, pp. 269-283, illus. 1893.

Steiger, J. B.

Physical and topographical features of Yuma County, Arizona. S. Rpt. No. 928, pt. 3, pp. 408-419. 1890.

Steiner, Ralph.

[Report on the commerce of Munich, Germany.] For. Mkts. Bul. No. 2, pp. 68-72. 1895.

Animals, cereals, dairy products, meats, cotton, tobacco, fruits, liquors, seeds.

Stejneger, Leonard.

Annotated list of the reptiles and batrachians collected by the Death Valley Expedition in 1891, with descriptions of new species. N. A. Fauna No. 7, pp. 159-228. 1893.

With field notes by Dr. C. Hart Merriam.

Stelle, J. P.

Report on entomological experiments and observations. 4th Rpt. Ent. Com., pp. 25-35, appx. iii. 1885.

Cotton blight—Boll rot—The flare—Other food plants than cotton—Annoyances to the cotton worm—Natural enemies—The yeast ferment remedy—Pyrethrum powder—Other vegetable poisons—Arsenical poisons (london purple, paris green, arsenic).

Stephan, Theodore M.

Tuberculosis among cattle in Saxony. 10th and 11th Rpts. B. A. I., p. 99. 1896.

Stetson, Ezra.

Swine breeding. Misc. Spl. Rpt. No. 2, pp. 160-162. 1883.

Stevens, William B.

A brief history of the silk culture in Georgia. Ag. Rpt. 1845, pp. 806-817.

Stevenson, J. C.

[Address on road improvement.] Road Inq. Bul. No. 10, pp. 22, 23. 1894.

Stewart, E. W.

Cutting and cooking food for animals. Ag. Rpt. 1865, pp. 396-407, illus.

Why fodder should be cut—Mixing different qualities of food—What is gained in cutting for a small stock—Straw cutters—Cooking food for animals—Value of straw, analyses, etc.—Average composition of wheat straw—Corn fodder and bean straw—Cultivated grasses, average, dried at 212° F.—Indian corn and wheat bran—Oats and rye—Barley—Beans and peas—Steam apparatus—Preparing food for steaming—Cheap steamer—Arrangement for a large stock—Results of cooking—Opinions of American and English farmers—Amount of straw and coarse fodder wasted.

Cattle feeding in New York. Ag. Rpt. 1876, pp. 299-311.

Present condition of cattle feeding in New York—Feeding cattle raised by others—An experiment—True system of meat production for New York—Full feeding and early maturity—Ellsworth twins—Another example—The profit of early maturity—Cost of a two-year-old steer.

Stewart, F. L.

Maize and sorghum as sugar plants. Ag. Rpt. 1877, pp. 236-264, illus.

Crystallizable sugar—Sugar production in Louisiana—Results of experiments with maize and sorghum—Botanical relationships—Period of growth—Propagation—Rattooning, or tillering—Climate—Soil—Manures—Chemical composition—Sorghum and maize as compared with the sugar beet—Climatic range of sorghum and maize—Soils—Effects of manures—Cost of production—Improvement of the soil—Yield per acre—Corn and the beet as forage plants in France—System of manufacture for general use—Preparation of the soil—Period of harvesting—Curing of green corn—Precautions to be observed—Crushing mills—Heating tanks—Evaporating apparatus—Finishing pan—The cooler—Crystallizing vessels—Process of manufacture—Chemical means employed—Treatment of juice in the tanks—Chemical reactions—Evaporation—Crystallizing—Special treatment of sorghum in crystallization—Analysis of dried sugar corn.

Stickney, Lyman D.

[Report on farm crops, etc., in District of Columbia.] Ag. Rpt. 1849, pp. 192-194.

Tropical Florida. Ag. Rpt. 1861, pp. 402-404.

Stiles, Charles Wardell.

The country slaughterhouse as a factor in the spread of disease. Y. B. 1896, pp. 155-166, illus.

Introduction—Notes taken at the various slaughterhouses—Slaughterhouses naturally centers of disease—Preventive methods—General suggestions—Summary.

Report upon the present knowledge of the tapeworms of poultry. B. A. I. Bul. No. 12, pp. 9-79, illus. 1896.

The flukes and tapeworms of cattle, sheep, and swine, with special reference to the inspection of meats. B. A. I. Bul. No. 19, pp. 11-136, illus. 1898.

Stiles, Charles Wardell, and Albert Hassall.

The color of a host and its relation to parasitism. I. L., vol. 4, pp. 265, 266. 1892.

A revision of the adult cestodes of cattle, sheep, and allied animals. B. A. I. Bul. No. 4, pp. 134, illus. 1893.

Stiles, Harvey C.

Spraying for black scale in California. I. L., vol. 2, p. 146. 1889.

Stohmann, F.

Heat equivalent of the nutrients of food. E. S. R., vol. 6, pp. 590-608. 1895.

Stokes, Charles.

Wornout lands of New Jersey. Ag. Rpt. 1861, pp. 206-209.

Stokes, John W.

Report of the Acting Commissioner of Agriculture. Ag. Rpt. 1867, pp. v-xix.

Progress of agriculture—Retrogression—The politics of agriculture—Railroads—The wool interest—Southern affairs—Stock importation—Department operations—The seed distribution—Propagating garden—The experimental farm—The Chemical Laboratory—Statistics—The Department building—Finance.

Cranberry culture in New Jersey. Ag. Rpt. 1877, pp. 569–576.

Soil—Savanna soil—Grasshoppers—Irrigation and liming—Fertilizers—Natural cranberry bogs—Storing cranberries—Coloring wild berries—Cranberry vines—Sulphuring vines—Solar heat—Pine stumps—Profitable cultivation of peat lands.

Report of the Microscopist. Ag. Rpt. 1885, pp. 89–108, illus.

Miscellaneous work—Textile fibers—Parasites in domestic fowls—Fungi—Tests of butter and other fats—Examination of butter and its substitutes—To separate butter crystals—Mounting butter crystals—Chemical test for butter, oleomargarine, and butterine—How to detect the crystals of lard by the naked eye—Edible mushrooms of the United States.

Report of the Microscopist. Ag. Rpt. 1886, pp. 139–145, illus.

Miscellaneous work—The physiological action of borax—Arrangement of microscope, etc.—Crystalline formations of butter—Crystals of fats—How to mount crystals of fats—Beef fat—Oleo—Neutral lard—Oleomargarine—The Bunsen filter pump—Cottonseed oil used in oleomargarine—Benne oil—Peanut oil—Butter tests corroborated.

Report of the Microscopist. Ag. Rpt. 1887, pp. 617–625, illus.

Miscellaneous work—Special breeds of cattle in relation to butter crystals—Oleomargarine and butterine—Use of terms—Oleo—Stearine—Stearic acid—Commercial stearine—Condition of fats in health and disease—List of persons submitting samples of butter, fats, oils.

Report of the Microscopist. Ag. Rpt. 1888, pp. 559–564, illus.

Black pepper—White pepper—White mustard seed—Black mustard seed—Cloves—Allspice—Cinnamon—Color reactions of fats and oils and fluorescence—A new pocket polariscope (oleomargariscope).

Report of the Microscopist. Ag. Rpt. 1889, pp. 191–200, illus.

Tea and its adulterations—Original microscopic investigations—How to detect stone cells in the tea leaf—Olive oil and lard, and their adulterants—Original investigations relating to color reactions.

Report of the Microscopist. Ag. Rpt. 1890, pp. 361–374, illus.

The silver test for the adulterations of lard and oils—How to detect fictitious lard—Silver test for olive oil—Mushrooms of the United States—Eight edible mushrooms of the United States—Mushroom culture—Artificial mushroom spawn—Twelve poisonous mushrooms—Butter and fats—Original microscopist investigations.

Taylor, Thomas—Continued.

Report of the Microscopist. Ag. Rpt. 1891, pp. 415-416, illus.

Improved methods of distinguishing between pure and fictitious lard—Adulterated coffee—Four edible mushrooms of the United States—Mushroom culture—Glossary of terms used in describing mushrooms—Mechanical devices perfected during the year.

Report of the Microscopist. Ag. Rpt. 1892, pp. 281-292, illus.

Work of the year—Edible and poisonous mushrooms—Culinary preparation of certain edible mushrooms—Detection of poisonous mushrooms by means of a silver spoon, onions, etc.—Three edible mushrooms—*Amanita*—*Lepiota*—*Cortinarius*—The volva—The mushroom veil—Mushroom gills—Mushroom spores—Silver nitrate test for oils—Crystallization of oils or other acids.

Report of the Chief of the Division of Microscopy. Ag. Rpt. 1893, pp. 297-302, illus.

Work of the year—A mushroom herbarium—Microscopical investigations—Investigation of the cotton staples of the United States—Measurement of cotton fibers—Four edible mushrooms—*Russula virescens*—*Coprinus comatus*—*Marasmius oreades*, "fairy ring mushroom"—*Agaricus*—Crystallization of seed-oil fats and animal fats—Chaulmugra fat—Cocoanut oil—Carapa, or "crab" oil fat—"Palm-oil" fat—Animal fats.

Report of the Chief of the Division of Microscopy. Ag. Rpt. 1894, pp. 195, 196.

Taylor, William A.

Report of the Assistant Pomologist. Ag. Rpt. 1893, pp. 277-296, illus.

Office work—The fruit crop of the year—Climatic conditions—Apples and pears—Peaches, plums, and small fruit—Grapes—Oranges and lemons—Figs—Exhibit of the Division at the World's Fair—Uncertainty of varietal names of fruits—Seeds, plants, and scions received and distributed—Apple—Plum—Cherry—Fig—Australian fruit and nut trees—Miscellaneous—Promising new fruits—Apple—Pears—Quince—Peach—Plums—Cherry—Grape—Raspberry—Semitropical fruits—Kaki—Orange—Wild fruits—Persimmon—Papaw—Nuts—Almond—Chestnuts—European hazel—Shagbark—Pecans—Black walnut.

Small-fruit culture for market. Y. B. 1895, pp. 283-294, illus.

Choice of location—Preparation of soil—Manuring—Planting and cultivation—Pruning and winter treatment—Varieties for market—Selection of plants—Harvesting and marketing—Strawberry—Blackberry—Raspberry—Current and gooseberry.

Tein, M. von.

Regimen of the Rhine region: High-water phenomena and their prediction. W. B. Bul. No. 2, pt. 1, pp. 117-121. 1894.

[Report on the commerce of Kingston, Canada.] For. Mkts. Bul. No. 4, pp. 30, 31. 1895.

Uhler, P. R.

Insects injurious to vegetation. Ag. Rpt. 1860, pp. 312-322.

Hemiptera and Heteroptera of the Death Valley Expedition. N. A. Fauna No. 7, pp. 260-265. 1893.

Underhill, F. S.

Report on artesian wells. S. Ex. Doc. No. 222, pp. 105-109, illus. 1890.

Underhill, R. T.

Preparations for sowing wheat. Ag. Rpt. 1845, pp. 432-434.

Underwood, Daniel K.

[Report of the American Pomological Society for Michigan.] Ag. Rpt. 1856, pp. 376-387.

Underwood, Lucien M.

Diseases of the orange in Florida. Jour. Mycol., vol. 7, pp. 26, 27. 1891.

Updyke, Stephen G.

Report on artesian wells. S. Ex. Doc. No. 222, pp. 110-124. 1890.

Upham, C.

Artificial manures. Ag. Rpt. 1861, pp. 144, 145.

Upton, William, jr.

[Report on farm crops, etc., in Maine.] Ag. Rpt. 1852, pp. 116-119.

Urich, F. W.

Notes on some insect pests of Trinidad, West Indies. I. L., vol. 196-198. 1893.

Van Buren, J.

[Report on farm crops, etc., in Georgia.] Ag. Rpt. 1851, pp. 318-322.

[Report on farm crops, etc., in Georgia.] Ag. Rpt. 1852, pp. 82-85.

Fruit culture at the South. Ag. Rpt. 1854, pp. 277-280.

Van Deman, H. E.

Report of the Pomologist. Ag. Rpt. 1886, pp. 259-276, illus.

The future of the division—Exports versus imports—Collection and distribution of varieties—Summary of investigations—Orcharding in northern New England, by Dr. T. H. Hoskins.

Report of the Pomologist. Ag. Rpt. 1887, pp. 627-652, illus.

The apple: diseases, insect depredations, and varieties—Peach, plum, orange, pomelo, kaki (Japanese persimmon), olive, date, cranberry—Propagating nut trees—Peach culture in the extreme southwest, by G. Onderdonk.

Van Deman, H. E.—Continued.

Report of the Pomologist. Ag. Rpt. 1888, pp. 565-595, illus.

Fruits examined—Cabinet of records—Official visits—Investigations in foreign countries—Our wild fruits—Paris Exposition—The apple—Varieties—Jefferies—Borovinka—Prolific Sweeting—Zolotoreff—Red Transparent—The pear—Wilder—Idaho—The plum—Wayland—Clyman—The peach—Bidwell's Early—The dwarf juneberry (*Amelanchier oblongifolia*)—Success—The pepino (*Solanum guatemalense*)—Our cultivated fruits—Native and introduced—Horticulture in art—The apple (*Pyrus malus*)—The pear (*P. communis*)—The peach (*Persica vulgaris*)—The nectarine (*P. vulgaris* var. *lævis*)—The almond (*Amygdalus communis*)—The apricot (*Armeniaca vulgaris*)—The quince (*Cydonia vulgaris*)—The fig (*Ficus carica*)—The pomegranate (*Punica granatum*)—The olive (*Olea europea*)—The banana (*Musa sapientum*)—The medlar (*Mespilus germanica*)—The loquat (*Eriobotrya japonica*)—The guava (*Psidium*)—The pineapple (*Ananassa sativa*)—The cocoanut (*Cocos nucifera*)—The date (*Phoenix dactylifera*)—The orange (*Citrus aurantium*)—The lemon (*C. limonium*)—The lime (*C. limetta*)—The citron (*C. medica*)—The shaddock (*C. accumana*)—The wild orange—The cherry (*Cerasus sylvestris* and *C. vulgaris*)—The plum (*Prunus*)—The grape (*Vitis*)—Small fruits: The strawberry (*Fragaria*)—The raspberry (*Rubus*)—The blackberry—The currant (*Ribes rubrum*)—The gooseberry—The cranberry (*Vaccinium macrocarpum*)—The huckleberry (*V. corymbosum*)—The barberry (*Berberis vulgaris*)—The juneberry (*Amelanchier canadensis*)—The buffalo berry (*Shepherdia argentea*)—The black haw (*Viburnum prunifolium*)—The tree cranberry (*V. opulus*)—The elderberry (*Sambucus canadensis*)—The mulberry (*Morus*)—The papaw (*Asimina triloba*)—The persimmon (*Diospyros virginiana*)—The Japanese persimmon (*D. kaki*)—Concluding remarks.

Report of the Pomologist. Ag. Rpt. 1889, pp. 433-452, illus.

Procuring and distributing seeds, plants, and scions of plants—Fruits ordered from foreign countries—The Asiatic persimmon—The fig—Asiatic peaches—The grape—The date—The citron—Native fruits—Wild fruits investigated—The chestnut—The plum—The currant—The apple—The pear—Grape sirup—A fruit ladder—Fruit growing in Florida—Tropical fruits—The cocoanut (*Cocos nucifera*)—The sapodilla (*Achras sapota*)—The mango (*Mangifera indica*)—The banana—Semitropical fruits—The kaki—Future work.

Report of the Pomologist. Ag. Rpt. 1890, pp. 409-424, illus.

The fruit crop—Trips of investigation—Distribution of seeds, plants, and scions of fruits—Nut culture—The pecan—The chestnut—The almond—Propagation—Native fruits—The apple—The strawberry—The grape—Tropical fruits—The pineapple—Semitropical—The kaki—The goumi.

Report of the Pomologist. Ag. Rpt. 1891, pp. 379-404, illus.

The fruit crop of the year—Fruit farming in southern Missouri—Strawberry culture in eastern Virginia—The Norfolk method—Varieties—Marketing—Special investigation of the kaki in Georgia and Florida—Seeds, plants, and scions distributed—Kaki—Citron—Date—Miscellaneous—Fruits received for examination and identification—The guava—Meeting of the American Pomological Society—Scientific pomology—Commercial pomology—Miscellaneous.

Report of the Pomologist. Ag. Rpt. 1892, pp. 247-280, illus.

The fruit crop of the year—The strawberry district of the South Atlantic coast—Florida—South Carolina—North Carolina—Fruit growing in Colorado—Seeds, plants, and scions distributed—Chestnut—Kaki—Orange—Miscellaneous—Promising new fruits—Apples—Russian apples—Crab apple—Pear—Cherry—Peach—Plum—Grape—Blackberry—Gooseberry—Raspberry (black)—Raspberry (purple)—Raspberry (red)—Strawberry—Tropical and semitropical fruits—Kaki—Loquat—Oranges—Lemon—Promising wild fruit—Persimmon—Nuts—Revision of fruit nomenclature—Rules for naming and describing fruits—A tree protector—Fruit culture in Minnesota, Wisconsin, South Dakota, and Iowa—The fruit crop of 1892—Fruit at the fairs—Orchards visited—Experimental work—Experimental tree station at Owatonna.

Van Diest, P. H.

Report on the geological conditions of artesian basins in eastern Colorado and New Mexico. S. Ex. Doc. No. 222, pp. 87-97, charts. 1890.

Van Slyck, De Witt C.

Cultivation of peppermint. Ag. Rpt. 1849, pp. 387-390.

Van Slyke, L. L.

Report on methods for the determination of nitrogen. Chem. Bul. No. 35, pp. 67-79. 1892.

The determination of casein in cow's milk. Chem. Bul. No. 38, pp. 109-116. 1893.

The determination of fat in cheese. Chem. Bul. No. 38, pp. 116, 117. 1893.

The determination of acidity in milk. Chem. Bul. No. 38, pp. 117-119. 1893.

The determination of albumen in cow's milk. Chem. Bul. No. 43, pp. 188-192. 1894.

Calculation of total solids in milk from the per cent of fat and the specific gravity, according to the formulas of Babcock, Fleischmann, and of Hehner and Richmond, compared with the gravimetric method. Chem. Bul. No. 43, pp. 193, 194. 1894.

Report on methods for the analysis of dairy products. Chem. Bul. No. 49, pp. 98-103. 1897.

Van der Stok, J. P.

The climate of the Malay Archipelago. W. B. Bul. No. 2, pt. 3, pp. 669-672. 1896.

Vasey, George.

Remarks on work of Division of Botany. Mo. Rpt. 1872, pp. 142, 143.

Report of the Botanist. Ag. Rpt. 1872, pp. 159-179, illus.

Forest-tree culture—The jute plant (*Corchorus*)—What is cundurango?—Cultivation of the cinchona—Effect of the change of climate upon the bark products in India—The black knot of plum and cherry trees.

Botanical notes. Mo. Rpt. 1872, pp. 222-225.

Liatris odoratissima—Shade and ornamental trees—Vegetation in western Kansas—Grasses for fixing a shifting soil.

Botanical notes. Mo. Rpt. 1872, pp. 313-317.

The cottonwood tree—Our native oaks (description and geographical distribution).

Forest tree culture. Mo. Rpt. 1872, pp. 381-387.

Cottonwood, maples, box elders, ailanthus, ash, walnut, elms, white willow, evergreens, pines, spruce (or fir), larch.

Botanical notes. Mo. Rpt. 1872, pp. 446-449.

Curious phenomenon in vegetable physiology—Rural adornment—American plants in Great Britain.

Botanical notes. Mo. Rpt. 1872, pp. 505-507.

A poisonous *Rudbeckia*—*Potentilla fruticosa*, or shrubby cinquefoil—Trees for cultivation—Experiments with forest trees in Kansas.

Botanical notes. Mo. Rpt. 1873, pp. 34, 35.

Branching palms—*Potentilla fruticosa* again.

Vasey, George—Continued.

Botanical notes. Mo. Rpt. 1873, pp. 115-117.

Apocynum as a fiber plant—Poisonous plants—Hardhack and *Potentilla fruticosa*—Forests and rainfall.

Interesting example of fasciation. Mo. Rpt. 1873, pp. 171, 172.

Botanical notes. Mo. Rpt. 1873, pp. 247-249.

Fertilization of wheat and other grasses—The Babylonian, or weeping, willow—Rocky Mountain oak.

Botanical notes. Mo. Rpt. 1873, pp. 354-356.

Supposed American origin of *Rubus idæus* (the garden raspberry)—*Anemopsis californica* (a new medicinal plant)—Grasses for the South and Southwest—Norway oats—Salt, or mint, weed.

Botanical notes. Mo. Rpt. 1873, pp. 503-506.

A poisonous California plant—Orchard grass—*Garrya elliptica*—Influence of the moon on vegetation—Multiplying plants by division.

Botanical notes. Mo. Rpt. 1873, pp. 585-587.

Bromus schraderi, or Australian oats—*Aquilegia chrysantha*—Purple cone flower (*Echinacea purpurea*)—Fertilization of flowers.

Botanical notes. Mo. Rpt. 1874, pp. 50-52.

Apocynum cannabinum as a fiber plant—Nourishment of buds through the bark—De Candolle's Prodrômus—*Populus monilifera* as a shade tree—Early flowering of the jasmine.

Circulation of sap—Rocky Mountain grasses. Mo. Rpt. 1874, pp. 151-156.

Report of the Botanist. Ag. Rpt. 1874, pp. 156-160.

Grasses for the South—Plants poisonous to cattle in California.

Botanical notes. Mo. Rpt. 1874, pp. 227, 228.

Flora of Colorado—Production of gum in fruit trees.

Poisonous plants [loco and rattlesnake weed]. Mo. Rpt. 1874, pp. 330, 331.

Grasses for the South. Mo. Rpt. 1874, pp. 379, 380.

[Remarks on Pentstemon.] Mo. Rpt. 1874, pp. 438, 439.

Botanical notes. Mo. Rpt. 1874, pp. 513, 514.

The persimmon—*Oxytropis lamberti* (said to be poisonous to cattle)—A valuable grass for the South and Southwest.

[Remarks on *Xerophyllum asphodeloides*.] Mo. Rpt. 1875, pp. 126, 127.

Forest trees of the United States. Ag. Rpt. 1875, pp. 151-186.

Centennial collection: *Magnoliaceæ*, *Anonaceæ*, *Capparidaceæ*, *Canellaceæ*, *Tamariscineæ*, *Guttiferae*, *Ternstroemiaceæ*, *Tiliaceæ*, *Zygophyllaceæ*, *Zanthoxy-laceæ*, *Simarubiaceæ*, *Burseraceæ*, *Olacineæ*, *Meliaceæ*, *Ilicineæ*, *Celastrineæ*, *Rhamnaceæ*, *Sapindaceæ*, *Anacardiaceæ*, *Vitaceæ*, *Leguminosæ*, *Rosaceæ*, *Hama-melaceæ*, *Rhizophoraceæ*, *Combretaceæ*, *Myrtaceæ*, *Cactaceæ*, *Araliaceæ*, *Corna-ceæ*, *Caprifoliaceæ*, *Rubiaceæ*, *Ericaceæ*, *Styraceæ*, *Cyrillaceæ*, *Ebenaceæ*, *Sapotaceæ*, *Theophrastaceæ*, *Bignoniaceæ*, *Verbenaceæ*, *Borraginaceæ*, *Oleaceæ*, *Nyctageniaceæ*, *Polygonaceæ*, *Lauraceæ*, *Eleagnaceæ*, *Euphorbiaceæ*, *Urticaceæ*, *Platanaceæ*, *Juglandaceæ*, *Cupuliferæ*, *Myricaceæ*, *Betulaceæ*, *Salicaceæ*, *Coniferæ*, *Palmaceæ*, *Liliaceæ*.

Flora of Japan. Mo. Rpt. 1875, pp. 178, 179.

North American maples. Mo. Rpt. 1875, pp. 313-315.

Report of the Botanist. Ag. Rpt. 1876, pp. 73, 74.

21713—No. 4—18

Vasey, George—Continued.

Report of the Botanist on grasses. Ag. Rpt. 1879, pp. 349–359, illus.

Panicum anceps (flat-stemmed panic grass), *P. agrostoides*, *P. proliferum* (crab grass, sprouting crab grass), *P. capillare* (witch grass), *P. gibbum*, *P. divaricatum* (cane-like panic grass), *Andropogon macrourus* (heavy-topped broom grass), *Triticum repens* (couch grass, quack grass), *Bromus sacalinus* (chess, or cheat), *Elymus canadensis* (large wild rye, lyme grass), *Festuca pratensis* (meadow fescue grass), *Glyceria aquatica* (reed meadow grass), *G. nervata* (nerve meadow grass), *Poa compressa* (wire grass, blue grass), *Avena striata* (wild oat grass), *Danthonia spicata* (spiked wild oat grass), *D. compressa* (compressed oat grass), *Phalaris intermedia* (American canary grass), *Anthoxanthum odoratum* (sweet vernal grass), *Dactylis glomerata* (orchard grass), *Bouteloua oligostachya* (grama grass), *Spartina cynosuroides* (fresh-water cord grass), *Muhlenbergia glomerata*, *Cinna arundinacea* (wood reed grass), *Tricuspis purpurea* (sand grass), *Aristida purpurea* (purple awned grass).

Report of the Botanist. Ag. Rpt. 1880, pp. 375–386, illus.

Paspalum ovatum, *Setaria italica* (Hungarian grass), *S. glauca* (foxtail, bottle grass), *Millium effusum* (wild millet), *Alopecurus pratensis* (meadow fox-tail), *Phleum pratense* (timothy), *Agrostis vulgaris* (red top), *Muhlenbergia mexicana* (wood grass), *M. sylvatica* (wood grass), *Calamagrostis canadensis* (blue-joint grass), *Buchloe dactyloides* (buffalo grass), *Aira cæspitosa* (hair-grass), *Arrhanatherum avenaceum* (meadow oat grass), *Holcus lanatus* (velvet grass, meadow soft grass), *Phragmites communis* (reed grass), *Melica mutica* (melic grass), *Glyceria canadensis* (rattlesnake grass), *Poa alsodes*, *Eragrostis poæoides* var. *megastachya*, *E. purshii*, *Bromus erectus* (erect brome grass), *Lolium perenne* (rye grass and Italian rye grass), *Hordeum nodosum* (barley grass, meadow barley), *Elymus virginicus* (wild rye grass), *E. striatus* (smaller wild rye grass).

Report of the Botanist. Ag. Rpt. 1881, pp. 231–255, illus.

Bermuda grass, wild oats (*Avena fatua*), *Polypogon monspeliensis* (beard grass), *Agrostis microphylla*, *A. exarata* (false red top), *Calamagrostis sylvatica*, *Muhlenbergia comata*, *Ericoma cuspidata* (bunch grass), *Stipa setigera* (beard grass, bunch grass), *Stipa eminens* (feather grass), *Aira danthonioides*, *Trisetum cernuum*, *T. subspicatum*, *Avena fatua*, *Danthonia californica*, *Koeleria cristata*, *Melica bulbosa* (bulbous melic grass), *M. imperfecta*, *Poa californica* (bunch grass), *P. arachnifera* (Texas blue grass), *Distichlis maritima* (salt grass, marsh grass), *Festuca microstachys* (small fescue grass), *Elymus condensatus* (giant rye grass), *Erodium cicutarium* (pin grass, alfilaria), *Trifolium procumbens* (small yellow clover), *Medicago lupulina* (hop medick, black medick), *M. sativa* (lucerne, alfalfa).

The grasses of the United States, being a synopsis of the tribes and genera, with descriptions of the genera, and a list of the species. Spl. Rpt. No. 63, pp. 47. 1883.

Report of the Botanist. Ag. Rpt. 1883, pp. 83–98, illus.

Grasses of the Great Plains—The cheat question—Bermuda grass for hay—Description of grasses.

Report of the Botanist. Ag. Rpt. 1884, pp. 123–136, illus.

Description of loco weeds.

The distribution of North American forest trees. Misc. Spl. Rpt. No. 5, pp. 38–43. 1884.

Report of the Botanist. Ag. Rpt. 1885, pp. 63–88, illus.

Description of foreign and native medicinal plants—Notes on grasses—Fungous diseases of plants, by F. Lamson-Scribner—The smut of timothy (*Tilletia striæformis*), by William Trelease.

The grasses needed for agriculture in the United States and the necessity for experiment stations. Misc. Spl. Rpt. No. 9, pp. 168–173. 1885.

Vasey, George—Continued.

Report of the Botanist. Ag. Rpt. 1886, pp. 69-93, illus.

History of the division—Exposition work—Work with grasses—Foreign inquiries, etc.—Relation of the division to other branches of the Department—Directions to correspondents—Some native clovers—Weeds of agriculture.

Report of an investigation of the grasses of the arid districts of Kansas, Nebraska, and Colorado. Bot. Bul. No. 1, pp. 19, illus. 1886.

Report of the Botanist. Ag. Rpt. 1887, pp. 301-321, illus.

Forage plants—Weeds of agriculture—Medicinal plants—Immediate influence of cross-fertilization upon the fruit—Secondary results of pollination.

A report on certain grasses and forage plants for cultivation in the South and Southwest. Bot. Bul. No. 3, pp. 63, illus. 1887.

Desiderata of the herbarium for North America north of Mexico: Ranunculaceæ to Rosaceæ, inclusive. Bot. Bul. No. 4, pp. 15. 1887.

Report of the Botanist. Ag. Rpt. 1888, pp. 305-324, illus.

Grasses and weeds—The pastoral resources of Montana—Mining and stock raising—General features in Montana—Climate—Native grasses—Concluding remarks.

Notes on grasses. Bot. Bul. No. 8, pp. 16, 17. 1888.

Grass experiment stations. Bot. Bul. No. 8, pp. 9-16. 1889.

Botanical notes. Bot. Bul. No. 8, pp. 18, 19. 1889.

The genus *Panicum* in the United States. Bot. Bul. No. 8, pp. 20-39. 1889.

Report of the Botanist. Ag. Rpt. 1889, pp. 377-396, illus.

General statement—Relation of botany to agriculture—Advance of botanical science—Purpose of the Botanical Division—Uses of the herbarium—Experiment grass station at Garden City, Kansas—Noxious weeds—*Shortia galacifolia*—The extermination of nut grass—Florida plants—*Uniola palmeri*—Useful desert plants.

Report of the Botanist. Ag. Rpt. 1890, pp. 375-392, illus.

Introduction—Forage experiments—Other experiments—Herbarium—Medicinal plants—Publications—Insecurity of the herbarium—Mississippi Experiment Station—Experiment station at Garden City, Kansas—Grasses for arid districts—Noxious weeds—New fodder grasses.

Notes on some Pacific Coast grasses. Cont. Nat. Herb., vol. 1, pp. 265, 266. 1890-1895.

Description of new or noteworthy grasses from the United States. Cont. Nat. Herb., vol. 1, pp. 267-280. 1890-1895.

Description of new grasses from Mexico. Cont. Nat. Herb., vol. 1, pp. 281-285, illus. 1890-1895.

Report of the Botanist. Ag. Rpt. 1891, pp. 341-358, illus.

Field work—Publications—Grass and forage experiment station at Garden City, Kansas—Cooperative stations in the West and Southwest—Cooperative branch stations in the South—Characteristic vegetation of the desert region from western Texas to central Arizona—Two weeds new to the United States.

Plates and descriptions of the desert region of western Texas, New Mexico, Arizona, and southern California. Bot. Bul. No. 12. 1891.

Vasey, George—Continued.

Report of the Botanist. Ag. Rpt. 1892, pp. 201-214, illus.

Work of the year—Field work—Office work—Publications—Experiments on grasses and other forage plants—Investigation of weeds—The grass experiment station of the Department at Garden City, Kansas—Report of Dr. J. A. Sewell—Grasses—Other forage plants—Grains—Experiments on evaporation—Tree planting—Mode of cultivation—Cooperative branch stations in the South—Hungarian brome—(*Bromus inermis*)—Teosinte (*Euchlana luxurians*)—Crab grass (*Panicum sanguinale*)—Cowpea (*Dolichos sinensis*)—Melilotus (*Melilotus alba*)—Alfalfa (*Medicago sativa*)—Hairy vetch (*Vicia villosa*)—The Russian thistle.

Plates and descriptions of the grasses of California, Oregon, Washington, and the Northwestern coast, including Alaska. Bot. Bul. No. 13, 1893.

Vasey, George, and Peter Collier.

Report of the Botanist and Chemist on grasses and forage plants. Ag. Rpt. 1878, pp. 157-194, illus.

Panicum texanum (Texas millet), *P. crusgalli* (barnyard grass, cock's-foot grass), *P. sanguinale* (crab grass), *P. virgatum* (tall panic grass, switch grass), *P. filiforme* (slender crab grass), *P. jumentorum* (Guinea grass), *P. obtusum* (obtusely flowered panic grass), *Cynodon dactylon* (Bermuda grass, wire grass), *Eleusine indica* (crowfoot, yard grass, dog's-tail), *Dactyloctenium aegyptiacum* (crowfoot grass), *Tripsacum dactyloides* (grama grass), *Sorghum halapense* (Johnson grass, false Guinea grass), *Sorghum nutans* (Indian grass, wood grass), *Bromus unioloides* (Schrader's grass, rescue grass), *Bromus carinatus* (California brome grass), *Andropogon scoparius* (broom grass, broom sedge), *Hierochloa borealis* (Vanilla, or Seneca grass), *Sporobolus indicus* (smut grass), *Agrostis exarata* (Northern redtop), *Poa serotina* (fowl meadow grass), *P. pratensis* (Kentucky blue grass), *Tricuspid seslerioides* (tall redtop), *Paspalum lare* (water grass), *Muhlenbergia diffusa* (dog-seed, nimble Will), *Leptochloa mucronata* (feather grass), *Setaria setosa* (pigeon grass, bristle grass), *Uniola latifolia* (wild fescue). Forage plants: *Lespedeza striata* (Japan clover), *Desmodium* (tick seed, beggar-lice), *Richardsonia scabra* (Mexican clover)—Nutrition of plants and animals—Method of analysis of grasses—Analysis of the ash—Glossary of terms used in describing grasses.

Black pepsin—Banana meal—Food adulteration—Adulteration of honey—Experiments with sugar beets—The production of seeds—Culture work—Yield—Cost of the production of one acre of beets—General distribution of seed by the Department—Experiments with sorghum—Tests of varieties—Experiments in molasses making—Experiments at Medicine Lodge, Kansas—Seed-selection work at Medicine Lodge—Experiments in the culture of sugar cane—Miscellaneous work.

Experiments with sugar beets in 1891. Chem. Bul. No. 33, pp. 90. 1892.

Record of experiments with sorghum in 1891. Chem. Bul. No. 34, pp. 132. 1892.

“With the collaboration of Dr. G. L. Spencer, Mr. A. A. Denton, and Mr. Wibray J. Thompson.”

Nostrums for increasing the yield of butter. F. B. No. 12, pp. 16. 1893.

Experiments with sugar beets in 1892. Chem. Bul. No. 36, pp. 74. 1893.

“With the collaboration of Dr. Walter Maxwell, assistant in charge of the Schuyler station.”

Record of experiments with sorghum in 1892. Chem. Bul. No. 37, pp. 100. 1893.

“With the collaboration of Messrs. A. A. Denton, Glen O'Brien, C. I. Hinman, Wibray J. Thompson, J. L. Fuelling, and Oma Carr.”

Report of the Chemist. Ag. Rpt. 1893, pp. 169–198.

Work of the division at the World's Fair—Arrangement of the laboratory apparatus and fixtures—Practical tests and analyses—Beer analyses for jury of awards—Experiments with sugar beets—Sugar-beet seed distributed—Sugar-beet analyses at the World's Fair—Unsatisfactory results of experiments—A limited distribution of high-grade seeds—Experiments at Schuyler, Nebr.—The selection of mother beets—Siloing sugar beets—Results—Increased weight of siloed beets—Analyses for determining sugar content—The production of seed—Yield and quality of seed—Cost of producing beet seeds—Experiments in beet culture—Analytical data—The growth of beets at different altitudes—Unfavorable climatic conditions of Nebraska—Special experiments—General considerations—Experiments in the improvement of sorghum as a sugar-producing plant—An insect visitation—Temperature and rainfall—Cultural work—Comparison of different varieties of canes—Selection of seed canes—The future of the sorghum industry—The disposal of left-over seed heads—Experiments at Runnymede, Fla.—Capability of pine lands for growth of cane—Cane grown on sandy soils—Cane-growing in the muck soils—Cassava as a rotation crop—Tobacco culture—Prospects—Wood analyses—Tannin and tanning materials—Resins in pine trees—Analyses—Food adulteration—Added preservatives—The use of copper and zinc—Vessels used—Food value and digestibility of canned goods—Purposes of the investigation—Protests of packers—Miscellaneous work.

Wiley, H. W.—Continued.

Mineral phosphates as fertilizers. Y. B. 1894, pp. 177-192, illus.

Apatites—Coprolites—Phosphate rock—Constituents of phosphate rock—Direct application of phosphates—Cost of phosphatic fertilizer to the farmer—What is meant by “available phosphoric acid”—Superphosphate, or acid phosphate—Phosphate as basic slag—Adulteration of basic-slag phosphates—Phosphates in marls—Rules for the application of phosphatic fertilizers.

Experiments with sugar beets in 1893. Chem. Bul. No. 39, pp. 59. 1894.

“With the collaboration of Dr. Walter Maxwell, assistant in charge of the Schuyler station.”

Record of experiments with sorghum in 1893. Chem. Bul. No. 40, pp. 40. 1894.

“With the collaboration of Messrs. Oma Carr and C. I. Hinman.”

Sweet cassava: Its culture, properties, and uses. Chem. Bul. No. 44, pp. 16, illus. 1894.

Report of the Chief of the Division of Chemistry. Ag. Rpt. 1894, pp. 151-155.

Report of the Chemist. Ag. Rpt. 1887, pp. 181-300.

Preliminary notes—Composition of American beers, wines, and ciders, and substances used in their adulteration, by C. A. Crampton—Experiments with sorghum at Fort Scott, Magnus Swenson—Abstract of report on sorghum, by E. B. Cowgill—Experiments with sorghum at Rio Grande, N. J., by H. A. Hughes—Experiments with cane at Lawrence, La.—Brown coal and wood char in the filtration of cane sirups, by W. J. Thompson—Certain plants of economic value as food for man and stock in Texas and New Mexico, by Clifford Richardson—Miscellaneous work of the division.

Soil ferments important in agriculture. Y. B. 1895, pp. 69-102, illus.

Vitality of the soil—Solution of soil particles—Decay of rocks at high altitudes—Translation of mineral matters in plants—Kinds of organisms—The nitrifying ferments—Formation of ammonia—Production of nitrous acid—Conversion of nitrous into nitric acid—Conditions favoring nitrification—Influence of position—Effect of temperature—Action of light—Benefit of aeration—Utility of tillage—Necessity for lime—Seeding the soil with nitrifying organisms—Numbers and kinds of nitrifying organisms—Ferments oxidizing free nitrogen—Ferments inimical to agriculture—Pathogenic ferments—Use of sewage as fertilizers—The storage of nitrates—Genesis of guano—Impregnation of soils with nitrates—Properties of nitrate of soda—Decomposition of sodium nitrate—Need of sodium nitrate—Consumption of sodium nitrate—Value of Chile saltpeter—Methods of preserving nitrates in the soil—Absorption of nitrates by plants—Fallow fields—The supply of raw material for the action of ferments—Contributions from the ocean—Relation of different crops to fermentative activity—The relation of humus to soil ferments—Determination of the activity of soil ferments—Precautions in sampling—The culture solution—Noting the progress of nitrification—Representation of the data obtained—Preparation of pure cultures—Summary.

Report of the Chief of the Division of Chemistry. Ag. Rpt. 1895, pp. 145-148.

Number and kinds of samples received for analysis—Work done for other divisions and other departments of the Government—Investigation of food adulteration—Work for the Association of Official Agricultural Chemists—Investigation of soils—Miscellaneous work—Official advertising—Investigations for coming year.

Analyses of cereals collected at the World's Columbian Exposition and comparisons with other data. Chem. Bul. No. 45, pp. 57. 1895.

Wiley, H. W.—Continued.

Potash and its function in agriculture. Y. B. 1896, pp. 107–136.

Origin of potash—Loss of potash during weathering—Percentage of potash in feldspars—Distribution of the potash in the soil—Relative solubility of particles of different degrees of fineness—Relation of potash to other mineral ingredients in silts of different magnitude—Distribution of potash in the soil and subsoil—Relative activity of different solvents for potash—Percentage of potash removed from soils by weak organic acids—Amount of potash in one acre—Quantity of potash withdrawn from the soil by the more important crops—Relative quantities of potash in kernels and straw—Available potash—Origin of potash deposit—Quantity of potash salts used annually—Methods of preparing high-grade salts—Changes in potash deposits—Composition of the principal salts—Manufactured compounds—Other sources of potash—Formula for potash fertilizers—Kind of soil requiring potash fertilizers—Conditions necessary to secure the best results in the use of potash fertilizers—Lime as an adjunct of potash—Effects of poor drainage—The best kinds of potash fertilizer—Injurious salts—Preservation of stall manure—The proper time and method of applying potash fertilizers—Indirect effects of potash salts—Conservation of soil moisture—Influence on decomposition of minerals—Protection against frost—Retardation of nitrification—Potash salts as insecticides and fungicides—Summary.

Report of the Chief of the Division of Chemistry. Ag. Rpt. 1896, pp. 9–14.

Analytical work—Character of the work—Miscellaneous investigations—Cooperation with official agricultural chemists—Progress of the work—Publications—Recommendations.

Zinc in evaporated apples. Chem. Bul. No. 48, pp. 38. 1896.

The mechanical analysis of basic phosphatic slags. Chem. Bul. No. 49, pp. 78–80. 1897.

The sugar beet: Culture, seed development, manufacture, and statistics. F. B. No. 52, pp. 48, illus. 1897.

Report of the Chief of the Division of Chemistry. Ag. Rpt. 1897, pp. 1–5.

Study of typical soils—Study of foods—Cooperation of the Association of Official Agricultural Chemists—Miscellaneous—Proposed work for the coming year.

Wiley, John M.

[Report on the commerce of Bordeaux, France.] For. Mkts. Bul. No. 3, pp. 40–42. 1895.

Cotton and cotton-seed oil—Agricultural implements—Cereals—Domestic animals—Liquors and dairy products—Fruits—Suggestions.

Wilkinson, John.

Country roads and road laws. Ag. Rpt. 1868, pp. 348–366, illus.

The macadamized or broken stone road—The gravel and other road beds—Plank roads—The longitudinal grade for a road—Stones on earth and gravel roads—Water for teams—Water bars—Shell roads—Road gutters—Country road engineering—Width between fences—Shade for roads—Existing road laws—Proposed system—Cost of roads and expenses of repairs—Bridges.

Willard, X. A.

American dairying: Its rise, progress, and national importance. Ag. Rpt. 1865, pp. 431–455.

Commencement of cheese dairying as a specialty—Its history, etc.—Progress of the factory system in the State of New York, and capital invested in the business—Cost of manufacturing cheese in families, etc.—Advantages of the factory system—Objections to the factory system—The organization, selection of factory sites, etc.—Factory site—Cost of manufacture at the factory—Delivering the milk—Treatment of the evening milk—Proximate acidity of milk for fine cheese—Application of sour whey—Size of

Willard, X. A.—Continued.

cheese—Cost of producing milk in old districts—Old districts unfavorably affected—A foreign market now demanded—Permanency of the system—Butter factories—Dairy products of the United States—Amount of butter and cheese made in 1860 and 1850—Imports of cheese and butter.

English and American dairying: Their points of difference and comparative merits. Ag. Rpt. 1866, pp. 358–381.

The cheese districts of England—Somerset and its system of farming—Description of stock—Quantity of cheese, etc.—Wiltshire—The white lias and dairy district—Manner of making Wilts cheese—The cheese market at Chippenham—Gloucestershire—Cheese apparatus and mode of Single Gloucester cheese manufacture—Cheddar cheese making—Cheshire cheese making—Appearance and comparative merits of American cheese abroad—Styles of cheese demanded—Color—Defects in American cheese—Bad flavor, etc.—The prospects of the English market—Weekly exports of cheese from New York to Liverpool and to England.

Willcocks, W.

The Nile. W. B. Bul. No. 2, pt. 1, pp. 121–142, charts. 1894.

Willemot, C.

On the destruction of noxious insects by means of the *Pyrethrum willemoti* duchartre. Ag. Rpt. 1861, pp. 223–231.

Botanical characteristics of the pyrethrum of Caucasus—Culture and gathering—Pulverization—Principal insects destroyed by means of the powder of pyrethrum—Method of application of the powder of pyrethrum.

Willet, J. E.

The cotton worm. Cot. Insects, pp. 358–361. 1897.

Williams, C. B.

Estimation of phosphoric acid in soils by double precipitation with molybdic solution and titration of the ammonium phosphomolybdate with standard alkali. Chem. Bul. No. 47, pp. 82, 83. 1896.

Williams, C. B., and B. W. Kilgore.

Comparison of results by old and new methods for citrate-insoluble phosphoric acid. Chem. Bul. No. 43, pp. 108, 109. 1894.

Williams, H. C.

Nut trees in Virginia. Ag. Rpt. 1856, p. 450.

Native grapes of Texas. Ag. Rpt. 1860, p. 499.

Williams, H. C.

Temperatures injurious to food products in storage and during transportation, and methods of protection from the same. W. B. Bul. No. 13, pp. 20. 1896.

Williams, James.

[Report on farm crops, etc., in Alabama.] Ag. Rpt. 1851, pp. 329–332.

[Report on farm crops, etc., in Alabama.] Ag. Rpt. 1852, pp. 73, 74.

Williams, James H.

[Remarks on cotton in Australia.] Ag. Rpt. 1856, pp. 298–300.

William, S. Wells.

[Remarks on introduction of plants from China.] Ag. Rpt. 1850, pp. 450–453.

Notices of Chinese agriculture and its principal products. Ag. Rpt. 1860, pp. 467–476.

Williams, Thomas A.

Timothy in the prairie region. Y. B. 1896, pp. 147-154, illus.

General remarks—Seeding—After-treatment of timothy meadow—Growing timothy for seed—The quantity of Western-grown timothy hay.

The renewing of wornout native prairie pastures. Agros. Circ. No. 4, pp. 4, illus. 1896.

Grasses and forage plants of the Dakotas. Agros. Bul. No. 6, pp. 47. 1897.

Sorghum as a forage crop. F. B. No. 50, pp. 20. 1897.

The soy bean as a forage crop. F. B. No. 58, pp. 19, illus. 1897.

Williams, W.

Bronchitis. S. Ex. Doc. No. 5, pp. 40-75. 1880.

Williams, W. L.

Infectious abortion of mares. 6th and 7th Rpts. B. A. I., pp. 449-456. 1891.

Willis, George J.

[Report of the commerce of Port Stanley and St. Thomas, Ontario.]
For. Mkts. Bul. No. 4, p. 39. 1895.

Williston, S. W.

An Australian parasite of *Icerya purchasi*. I. L., vol. 1, pp. 21, 22, illus. 1888.

Notes on the genus *Lestophonus*. I. L., vol. 1, pp. 328-331, illus. 1889.

Belvosia: A study. I. L., vol. 5, pp. 238-240, illus. 1893.

List of Diptera of the Death Valley Expedition. N. A. Fauna No. 7, pp. 253-259. 1893.

Willits, Edwin.

Industrial education. Misc. Spl. Rpt. No. 9, pp. 55-65. 1885.

Special report of the Assistant Secretary. Ag. Rpt. 1889, pp. 46-48.

Textile fiber production.

Remarks on resolutions providing for cooperation between the United States Department of Agriculture and the agricultural experiment stations in raising and testing fiber plants. O. E. S. Misc. Bul. No. 2, pp. 124, 125. 1890.

Special report of the Assistant Secretary. Ag. Rpt. 1890, pp. 59-73.

The scientific work of the Department in its relation to practical agriculture—The Department of Agriculture—Scientific work of the Department—The experimental—The remedial—General scientific work.

Special report of the Assistant Secretary. Ag. Rpt. 1892, pp. 67-84.

Duties of the Assistant Secretary—General review of the work for the last four years—Division of Botany—Division of Entomology—Division of Ornithology and Mammalogy—Division of Vegetable Pathology—Division of Forestry—Division of Pomology—Divisions of Chemistry and Microscopy and the Office of Experiment Stations—Office of Fiber Investigations—Artesian wells and irrigation—Conclusion.

Report of the Assistant Secretary. Ag. Rpt. 1891, pp. 65-81.

Cooperation of the Department of Agriculture with the educational forces in the United States relating to agriculture—The general field—Forces fostered wholly or in part by the General Government—The forces sustained in whole or in part by the States—Organizations of a voluntary

Willits, Edwin—Continued.

character—The press and the literature especially devoted to agriculture—Cooperation of the forces—Matters general to the whole country—What the Department can better perform than any other agency—What the Department should not do except incidentally.

[Address before the Association of Official Agricultural Chemists.]
Chem. Bul. No. 35, pp. 98–100. 1892.

Special report of the Assistant Secretary. Ag. Rpt. 1893, pp. 53–86.

The World's Columbian Exposition—Origin of the Exposition—Character and control of the Exposition—The Government Exhibit—Board of management for Government Exhibit: Its members, its powers, and its work—Scope of the Government Exhibit—Exhibit of the United States Department of Agriculture at the World's Columbian Exposition—Funds allotted to the Department—Nature of the Department's exhibit—Functions of the Department—The cereal collection—Collections of tobacco and wool—The cotton exhibit—Work of the special agents—Desirability of comprehensive monographs—The disposition of Government exhibits—Practical suggestions—Acknowledgments—Exhibit of the Weather Bureau—Exhibit of the Bureau of Animal Industry—Exhibit of the Bureau of Chemistry—Exhibit of the Division of Entomology—Exhibit of the Division of Ornithology and Mammalogy—Exhibit of the Division of Botany—Exhibit of the Division of Vegetable Pathology—Exhibit of the Division of Pomology—Exhibit of the Division of Forestry—The Cooperative Exhibit of the Office of Experiment Station and of Agricultural Colleges and Experiment Stations—Exhibit of the Office of Fiber Investigations—Exhibit of the Division of Illustrations—Exhibits of other Divisions.

[Good roads.] O. E. S. Bul. No. 14, pp. 21–23. 1893.

Wills, Thomas.

Hospital gardening. Mo. Rpt. 1865, pp. 12, 13.

Wilson, Lawrence.

Condition of the live stock industry west of the Mississippi. 2d Rpt. B. A. I., pp. 429–433. 1886.

Wilson, James.

Report of the Secretary of Agriculture. Ag. Rpt. 1897, pp. v–liv.

Objects of the Department—Scope of the Department work—Animal products and foreign markets—Experiments with sugar beets—Opportunities for new industries—Advance in seed distribution—Need of qualified agents in foreign countries—Grasses and forage plants—The Department scientists and their work—The world's markets for farmers—Experimental exports of butter—The problem of the farmer's home—Bureau and divisions.

Winfree, Philip.

Culture of indigo. Ag. Rpt. 1845, pp. 974, 975.

Wing, H. H.

The dairy industry of the United States. 4th and 5th Rpts. B. A. I., pp. 387–404. 1889.

Special points bearing on feeding experiments. O. E. S. Bul. No. 3, pp. 93, 94. 1891.

Winton, A. L.

On the use of sodium chloride in the Lindo-Gladding method of determining potash. Chem. Bul. No. 31, pp. 148–150. 1891.

Report on dairy products. Chem. Bul. No. 38, pp. 92–108. 1893.

The Babcock gravimetric method for the determination of solids and fat in milk—(Drying with asbestos in a perforated metal cylinder). Chem. Bul. No. 38, p. 119. 1893.

Winton, A. L.—Continued.

Does cream lose fat on keeping for a long time with and without bichromate of potash? Chem. Bul. No. 43, pp. 192, 193. 1894.

Report on potash. Chem. Bul. No. 49, pp. 27-41. 1897.

Winton, A. L., and H. J. Wheeler.

Report on potash. Chem. Bul. No. 47, pp. 14-23. 1896.

Wiscom, Samuel.

[Report on farm crops, etc., in Pennsylvania.] Ag. Rpt. 1851, pp. 260-262.

Wolfinger, John F.

Green manuring and manures. Ag. Rpt. 1864, pp. 299-328.

Ancient green manuring—Modern green manuring—Green manurial plants and grasses—American green manurial plants and grasses—Preparation of soil and seeding for a green manurial crop—Pasturing of green manurial crop—Plowing down of green manurial crop—Depth of plowing down—Benefits derivable from green manuring—Why green manurings are beneficial—What the best agricultural writers say of green manures—Objections to green manuring.

Indian corn culture. Ag. Rpt. 1866, pp. 215-224.

Soil—Preparation of soil—Selection and preparation of seed—Time and depth of planting corn, etc.—After-culture of corn—Manuring corn—Harvesting corn and corn fodder—Corn fodder and corn meal food—Varieties of corn.

Wolford, H. L.

On the importation and protection of useful birds. Ag. Rpt. 1853, pp. 71-74.

Woll, F. W.

Notes on agricultural education in the Scandinavian countries. O. E. S. Circ. No. 32, pp. 15-17. 1896.

Sugar beet experiments in Wisconsin in 1891. Chem. Bul. No. 33, pp. 90-111. 1892.

Woll, F. W., and George L. Teller.

Report on analysis of cattle foods. Chem. Bul. No. 38, pp. 122-135.

Wollny, Ewald.

The relation of the physical properties of the soil to the cultivation of plants. E. S. R., vol. 4, pp. 528-543, and 627-641. 1893.

The physical properties of the soil. E. S. R., vol. 6, pp. 761-774, and 853-863, and 948-963, illus. 1895.

The principal soil constituents—General physical properties of the soil constituents and of the soil as a whole—The behavior of the soil toward water—The behavior of the soil toward air and gases—The behavior of the soil toward heat.

Wood, Leonard.

Irrigation of desert land in Arizona. S. Rpt. No. 928, pt. 3, pp. 484, 485. 1890.

Wood, Samuel.

[Report on farm crops, etc., in New York.] Ag. Rpt. 1850, pp. 313-315.

Wood, Samuel N.

[Report on farm crops, etc., in Ohio.] Ag. Rpt. 1851, pp. 384-386.

Woodford, E. S.

Fish culture. Mo. Rpt. 1869, pp. 376, 377.
